Praise for *Transformative Conversations* "In the 'superstorm' of writings about the crisis in higher education this little gem of a book stands out like a mindfulness bell. It calls us back to the only thing that truly matters—the energy and wisdom buried in the minds and hearts of dedicated educators."

—Diana Chapman Walsh, president emerita, Wellesley College; trustee emerita, Amherst College; member of

the MIT Corporation "This book is revolutionary! It is about transforming the very essence of higher education through the power of authentic conversation, knowing that as the people within the institution evolve, the institution will transform." –Patricia and Craig Neal, *The Art of Convening: Authentic Engagement in Meetings, Gatherings, and Conversations*; founders, Heartland Inc. "This is a radical story about how to create a more intimate and relational culture inside the halls of higher education... for those who long for higher education to return from the abyss of siloed isolation to its original charter as a cooperative learning institution committed to developing the whole person in service of the common good." –Peter Block, *Flawless Consulting and Abundant Community Transformative Conversations* offers guidance to help readers create and sustain Formation Mentoring Communities, where faculty, staff, and administrators can speak openly and honestly to the heart of their work as educators and human beings. Not all project procurements are the same. Unless the project carefully makes an assessment of the items it will make, versus the items it will buy, and then adequately plans for these purchases, the risks of performance will increase. Project procurements are simply sub-projects, which need to be managed well, not blindly delegated to an independent organization to buy for the project. Certain procurements, major complexity developments, creating something new, which does not exist, according to the project's unique specification, must be managed by the project team, and supported by the professional procurement organization. The

project's team leader must assume the management responsibility. This book zeroes in on the effective management of that portion of the project which will be performed by another organization. It focuses on the procurement of scope from an organization outside of the project. Often, the success or failure of a project is dependent on how well the project can plan, define, solicit, authorize and manage this external relationship. This book has been updated to be consistent with Chapter 12 of the Fourth Edition of the PMBOK® Guide, released by PMI in December 2008.
