This volume celebrates the twenty-five years of courageous and fruitful communications ministry of the Interdisciplinary Centre for Social Communications (CICS) at the Pontifical Gregorian University in Rome, with articles contributed by pioneers, professors and ex-students. Those who founded CICS wanted to make a specific

contribution to the Church and developed a communications formation with an interdisciplinary approach, relating it to the major disciplines taught at the University , such as theology, philosophy, missiology and social sciences. Index - Indice

CONTRIBUTORS GENERAL INDICATIONS FOR THE AUTHORS The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on

the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings. The book takes its lead from academic Annamaria Pagliaro's experience straddling Australia and Italy over a thirty-year period. As both former colleagues and collaborators of Pagliaro, we editors intend to open a kaleidoscope of perspectives on the international research landscape in the fields of Italian and Anglophone studies, starting from Pagliaro's own contribution to the creation of relations between the two cultures in the period that saw her work transnationally as Director of the Monash University Prato Centre (2005-2008). This collection of the proceedings of the 3rd conference on bi- and multilingual universities, held at the Free University of Bozen-Bolzano from 20 to 22 September 2007, tries to give a state-of-the-art insight into theoretical and practical approaches towards implementing bi- and multilingual models and policies in higher education institutions in various parts of the world. This book considers how the main doctoral awarding countries from across the globe examine doctoral degrees. It compares and contrasts their approaches, comments on their robustness, and identifies examples of good practice. The doctorate is the highest award made by universities, but the examination process involved varies considerably in form and structure across the globe. This book studies the similarities and differences systematically on a cross-national basis, providing insights into the ways in which countries have sought to ensure that the awarded degree is comparable in standards. This book presents case studies of examination policies and practices covering 20 countries, which collectively are responsible for nearly 75% of global doctoral awards. Each chapter includes a summary of the key points, and a concluding chapter analyses the case studies from a comparative perspective. This book is written by a distinguished international team of authors who are researchers in doctoral education, and will be of interest to all those engaged in the field particularly policy-makers, graduate deans and programme leaders, supervisors, administrators, examiners, and scholars in the field.

"Bibliography of Italian studies in America" in each number, 1924-48. BOOK TWO OF THE ILLBORN SAGA How does the opportunity ever arise for one person to alter the destiny of a world? As the nations of Angall move closer to a Holy War, the four Illborn are to face momentous challenges, while seeking answers about who they are and what their growing powers mean. After Arion and Allana are drawn to opposing sides in the coming conflict, their mutual obsession threatens to bring ruin to them both. In Arlais, Leanna finds herself a target of both the Holy Church and of the killers who are closing in on her. And in Karn, Corin must respond to a deadly new peril, whilst coping with the devastating aftermath of the attack on his wife. How will the choices and actions of the four shape each of their destinies? Only this much is certain; the mysteries of the Gate and of their dreams still await them, and there will be no peace for the Illborn. Aduel's Sin is the thrilling and emotive second instalment of The Illborn Saga, the acclaimed epic fantasy series by Daniel T. Jackson. This volume is composed of 24 papers originally presented as talks at the VIII National Conference of the Italian Association of University Language Centres (Associazione Italiana dei Centri Linguistici Universitari:

AICLU), held at the University of Foggia, Italy, between 30 May and 1st June 2013. The contributions fall into five sections: 1) keynote addresses from plenary speakers; 2) innovative challenges for language centres; 3) new developments in teaching language for specific purposes; 4) proposals and case studies in Content and Language Integrated Learning; and 5) the use of new technologies in language learning. 18 papers are in English, four in Italian, one in French and one in German. The fact that three-quarters of the papers are in English reflects the way English has become the lingua franca of academic conferences today. However, in keeping with the ethos of CercleS (Confédération Européenne des Centres de Langues de l'Enseignement Supérieur, the pan-European organisation to which AICLU belongs), which is strongly committed to promoting plurilingualism, it was crucial that contributions would also be accepted in other languages. The volume represents the 'state of the art' in the field of language teaching and theory in university language centres not only in Italy, but also in other parts of Europe and the Mediterranean, and testifies to the rich variety of ways in which these centres are adapting and thriving in rapidly changing times. This Seventh Edition of the best-selling intermediate Italian text, DA CAPO, reviews and expands upon all aspects of Italian grammar while providing authentic learning experiences (including new song and video activities) that provide students with engaging ways to connect with Italians and Italian culture. Following the guidelines established by the National Standards for Foreign Language Learning, DA CAPO develops Italian language proficiency through varied features that accommodate a variety of teaching styles and goals. The Seventh Edition emphasizes a well-rounded approach to intermediate Italian, focusing on balanced acquisition of the four language skills within an updated cultural framework. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners, in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration. This reference presents the proceedings of an international meeting on the occasion of the University of

Bologna's ninth centennial-highlighting the latest developments in the field of geometry and complex variables and new results in the areas of algebraic geometry, differential geometry, and analytic functions of one or several complex variables. Building upon the rich tradition of the University of Bologna's great mathematics teachers, this volume contains new studies on the history of mathematics, including the algebraic geometry work of F. Enriques, B. Levi, and B. Segre ... complex function theory ideas of L. Fantappiè, B. Levi, S. Pincherle, and G. Vitali ... series theory and logarithm theory contributions of P. Mengoli and S. Pincherle ... and much more. Additionally, the book lists all the University of Bologna's mathematics professors—from 1860 to 1940—with precise indications of each course year by year. Including survey papers on combinatorics, complex analysis, and complex algebraic geometry inspired by Bologna's mathematicians and current advances, *Geometry and Complex Variables* illustrates the classic works and ideas in the field and their influence on today's research.

Il Volume, dedicato al tema della Sicurezza nei Cantieri edili, ha un taglio essenzialmente pratico ed operativo per gli "addetti ai lavori", ma rigorosamente inquadrato nel sistema legislativo come interpretato dalla giurisprudenza.
