Quality education Feb 14 2022 This book investigates the intersections between education, social justice, gendered violence and human rights in South African schools and universities. The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children, and marginalised communities. The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa. Contributors to this volume examine the many ways in which social justice and gendered violence mirror, express, project, and articulate the larger phenomenon of human rights violations in Africa and how, in turn, the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact and interpret quality education. The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces. This book is essential reading for scholars seeking a solid grounding in exploring quality education, the instances of epistemic disobedience, the political implications of place and power, and human rights in theory and practice.

Building Governance and Climate Change Aug 20 2022 The contribution of buildings to climate change is widely acknowledged. This book investigates how building regulatory systems are addressing the current and future effects of climate change, and how these systems can be improved. After presenting a comprehensive overview of how the current building regulatory system developed, some of the inadequacies are identified. The largest part of the book examines the potential for innovative policy solutions to address the real world problem of mitigating

and adapting buildings to climate change. This publication contributes significantly to our understanding of the complexities of long-term energy efficiency in buildings. This book was originally published as a special issue of the Building Research & Information journal.

Industrial Oil Crops Jan 01 2021 *Industrial Oil Crops* presents the latest information on important products derived from seed and other plant oils, their quality, the potential environmental benefit, and the latest trends in industrial uses. This book provides a comprehensive view of key oil crops that provide products used for fuel, surfactants, paints and coatings, lubricants, high-value polymers, safe plasticizers and numerous other products, all of which compete effectively with petroleum-derived products for quality and cost. Specific products derived from oil crops are a principle concern, and other fundamental aspects of developing oil crops for industrial uses are also covered. These include improvement through traditional breeding, and molecular, tissue culture and genetic engineering contributions to breeding, as well as practical aspects of what is needed to bring a new or altered crop to market. As such, this book provides a handbook for developing products from renewable resources that can replace those currently derived from petroleum. Led by an international team of expert editors, this book will be a valuable asset for those in product research and development as well as basic plant research related to oil crops. Up-to-date review of all the key oilseed crops used primarily for industrial purposes Highlights the potential for providing renewable resources to replace petroleum derived products Comprehensive chapters on biodiesel and polymer chemistry of seed oil Includes chapters on economics of new oilseed crops, emerging oilseed crops, genetic modification and plant tissue culture technology for oilseed improvement

Last Bell Oct 30 2020 In the mid-nineties, the Alfred Glickman School was just another failing school in one of America's most

violent cities. Then SABIS, a private, for-profit education provider, took over. Twenty years later, the school is a six-time silver medalist in U.S. News & World Report's annual "America's Best High Schools" listing, and every single graduate of the school has been offered a college place. With success of this magnitude, you would think that for-profit managed charter schools like SABIS would be in high demand. On the contrary, they are fought at every turn. Why is the idea of employing for-profit companies to help rescue failing public schools treated with fear and hostility? Stranger still, why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake? Last Bell is a book about politics, money and power. It examines the charge that for-profits running charter schools are in it for the money, not the kids, and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools. Last Bell is a reasonable voice in a polarized debate. It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance, turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future.

Creditworthiness Analysis. Instruments and Methods Sep 09 2021 Seminar paper from the year 2014 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: 1,7, University of Applied Sciences Saarbrücken, language: English, abstract: The following seminar paper superficially analyses the topic of creditworthiness analysis in order to provide the reader with the respective basics in regard to the topic. Finance is one of the main fields within the economics and the cornerstone both for the domestic and global businesses. Finance studies and investigates the opportunities in which individuals and enterprises source, allocate and use monetary funds and resources over time, considering the risks and the monetary developments such as inflation. It is a discipline that provides the monetary basis and structure for every kind of business. Finance is one of the most path breaking and strategically essential business sectors. In order to comprehend the finance and the financial structure of the company an individual or a manager has to be capable to conceive the complete business structure of the enterprise. The importance of finance for the international and local business environment but also for private persons is therefore crucial. It is important to mention that finance is a very manifold doctrine with diverse variations, manifestations and a long historical development. Because of the previously mentioned manifoldness of finance it should be consequently said that there is a massive amount of strategies to manage and to acquire the necessary financial or monetary basis

either for a corporate or for a private need. One of the most common and popular possibilities to acquire money for financing an investment, to pay the corporate debts or for the private purposes of a person, is to apply for a credit. Following to this fact it is relevant to emphasize that the credit-granting process is a very specific and complex procedure. The complexity of this process could be explained by different economic and political reasons. In order to maintain the stability of the financial markets, to protect the money-granting institutions or persons and the whole economic environment a credit cannot be granted without any guarantee and safeness for the back-paying. Henceforth the credit providing institutions and authorities use an analysis with the task to control the creditworthiness of credit users. The creditworthiness analysis was created within decades, shaped by different cultures and nations, affected by historical and economic mistakes and crises.

Cultural Impact on Earnings Management Apr 23 2020

Seminar paper from the year 2014 in the subject Business economics - Accounting and Taxes, grade: 1,0, Catholic University Eichstätt-Ingolstadt (WFI), language: English, abstract: This paper analyses the effect of Hofstede's cultural dimensions on earnings management on 433 firms in 18 European countries, all reporting under IFRS. The results of multivariate regression reveal that only one cultural variable, namely Power Distance, has a significant effect on earnings management measured by discretionary accruals. In contrast, the scores for Individualism and Masculinity have no significant influence. These findings suggest that culture still has an influence on earnings management as suggested by previous studies, but is diminishing due to international accounting harmonization.

Concise Guide to Information Literacy, 2nd Edition Dec 12

2021 A student's textbook and an instructional reference for
educators: the second edition of Concise Guide to Information
Literacy is both. It teaches students what information literacy is
and why it is an important skill to develop—for their schoolwork
as well as for success in life outside of school. The guide covers
major areas in the information literacy process, including
locating, evaluating, and applying information successfully. It also
gives professors, teachers, and librarians a flexible text that can

serve as the basis of a course in information literacy or research skills, a basic research guide for any information literacy course, or a supplemental text. This second edition has been reorganized for greater ease of use based on the information literacy models consulted. All chapters have been fully updated and now include extended coverage of the topics that appeared in the first edition; additionally, a new chapter on managing information has been added.
