Building Paths to the Middle Class Nov 30 2020
There is currently more focus than ever on the importance of earning a college degree. At the same time, many students and parents are dubious that America's expensive, one-size-fits-all higher education system can adequately educate students for an ever more diverse and sophisticated world of work. There are other educational options that are worth more sustained and serious attention. Technical programs provide many students with marketable job skills, often for far less time and money than four-year bachelor's degrees. Even still, many policymakers are hesitant to endorse tracking students into occupational training programs, and parents tend to have higher aspirations for their children than technical training. In turn, it is unclear

that students and parents are learning about these options at an early stage, or that consumers are generally aware of these programs' likely return on investment. American Enterprise Institute's (AEI) Center on Higher Education Reform sought to highlight a diverse array of technical training options available to students today, which led to AEI commissioning four case studies on high-quality occupational training programs that strive to prepare students for the workforce. The case studies answer the following questions: (1) How do students learn about these programs?; (2) What makes them work well, and what challenges do they face?; and (3) How successful are their graduates? These case studies are examples of interesting attempts to align education with the demands of today's labor market, which can not only aid researchers and policymakers, but also help inform practitioners who might consider offering similar programs in the future.

Cesar's Way Feb 20 2020 Cesar Millan—nationally recognized dog expert—helps you see the world through the eyes of your dog so you can finally

eliminate problem behaviors. From his appearances on The Oprah Winfrey Show to his roster of celebrity clients to his reality television series, Cesar Millan is America's most sought-after dog-behavior expert. But Cesar is not a trainer in the traditional sense—his expertise lies in his unique ability to comprehend dog psychology. Tracing his own amazing journey from a clay-walled farm in Mexico to the celebrity palaces of Los Angeles, Cesar recounts how he learned what makes dogs tick. In Cesar's Way, he shares this wisdom, laying the groundwork for you to have stronger, more satisfying relationships with your canine companions. Cesar's formula for a contented and balanced dog seems impossibly simple: exercise, discipline, and affection, in that order. Taking readers through the basics of dog psychology and behavior, Cesar shares the inside details of some of his most fascinating cases, using them to illustrate how common behavior issues develop and, more important, how they can be corrected. You'll learn:

- What your dog really needs may not be what you're giving him
- Why a dog's natural pack instincts are the key to your happy relationship
- How to relate to your dog on a canine level
- There are no "problem breeds," just problem owners
- How to choose a dog who's right for you and your family
- The difference between discipline and punishment
- And much more!

Filled with fascinating anecdotes about Cesar's longtime clients, and including forewords by the president

of the International Association of Canine Professionals and Jada Pinkett Smith, this is the only book you'll need to forge a stronger, more rewarding connection with your four-legged companion.

The CDC Field Epidemiology Manual Apr 23 2020 A NEW AND ESSENTIAL RESOURCE FOR THE PRACTICE OF EPIDEMIOLOGY AND PUBLIC HEALTH The CDC Field Epidemiology Manual is a definitive guide to investigating acute public health events on the ground and in real time. Assembled and written by experts from the Centers for Disease Control and Prevention as well as other leading public health agencies, it offers current and field-tested guidance for every stage of an outbreak investigation -- from identification to intervention and other core considerations along the way. Modeled after Michael Gregg's seminal book *Field Epidemiology*, this CDC manual ushers investigators through the core elements of field work, including many of the challenges inherent to outbreaks: working with multiple state and federal agencies or multinational organizations; legal considerations; and effective utilization of an incident-management approach. Additional coverage includes:

- Updated guidance for new tools in field investigations, including the latest technologies for data collection and incorporating data from geographic information systems (GIS)
- Tips for investigations in unique settings, including healthcare and community-congregate sites
- Advice for responding to

different types of outbreaks, including acute enteric disease; suspected biologic or toxic agents; and outbreaks of violence, suicide, and other forms of injury For the ever-changing public health landscape, The CDC Field Epidemiology Manual offers a new, authoritative resource for effective outbreak response to acute and emerging threats. *** Oxford University Press will donate a portion of the proceeds from this book to the CDC Foundation, an independent nonprofit and the sole entity created by Congress to mobilize philanthropic and private-sector resources to support the Centers for Disease Control and Prevention's critical health protection work. The Theory and Principles of Creating Effective Training Courses Feb 26 2023 It is no secret that the online learning industry is booming. But with a mass influx of course creators and marketers jumping into the 'educational gold rush' to make money, the critical components of developing quality and effective training are being lost. Anyone can create and sell online courses to a global marketplace today, at minimal expense and from their own spare rooms - which is a great thing for everyone. However, if you aspire to create transformational online or face to face training programs that engage and enrich your learners; it is vital that you design and develop

your programs with the fundamental theory and principles of adult learning and course creation in mind. Training that does not satisfy your learners, or follow quality educational practices, will attract negative reviews, a bad reputation and refund requests - something that no course creator or 'edupreneur' wants to face. With the learning industry becoming a rapidly more competitive field, survival in this lucrative market is about creating remarkable training that has the learner experience at its core. This book has been especially designed by multiple-award winning, qualified education professional, Sarah Cordiner for the modern day, quality-conscious course creator, edupreneur and training manager who cares about their learner experience. It is for those who want to plan, prepare and deliver transformational training that changes the lives of those that they teach. By presenting timeless theories, principles, frameworks, processes and practices for designing, developing and delivering highly effective training programs, this book will help you create learning that will positively impact your learners - and your business.

The Anarchist Cookbook Apr 16 2022 The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

A Comparison of Traditional and Web-based Floral Design Courses Nov 18 2019 As technology has advanced, corporations, government entities, and institutions of higher education have all begun experimenting with online classes and training.

In colleges and universities around the world, everything from individual online classes to entire online degree programs are now offered. While many researchers and educators support this trend, many are concerned with whether online education is truly comparable to traditional, live instruction. The goal of this study was to evaluate an online version of a floral design course in comparison to the traditional version of the class. There were 140 students in the sample, including both the online and traditional classes. All were students at Texas A & M University in College Station, Texas. During the spring semester of 2003, the experimental group was enrolled in the online version of the course, while the control group was enrolled in the traditional version of the course. Students in both groups were asked to fill out surveys at the beginning and end of the semester to collect background information and to evaluate the course. Their floral designs were evaluated at the beginning and end of the class in order to measure design skill, and grades earned in the class were also collected at the end of the semester for comparison purposes. Statistically significant differences were noted in class grades, with traditional students outperforming the Web-based students in lecture points, lab points, and overall course grades. No statistically significant differences were noted in terms of student course satisfaction. In addition, students in the traditional class

outperformed Web-based students in design skills. Besides class differences in performance, variables such as gender and distance course preparedness seemed to affect the outcome of some measures. Overall, females outperformed males in both classes. In the Web-based class, students found to be more prepared for distance learning courses fared better than students who were not as prepared. These results may indicate that certain students may do better in an online course than others, and it may be possible to screen these students in advance in order to maximize success in the online classroom.

Teaching and Learning in a Multilingual School
Jan 21 2020 *Teaching and Learning in a Multilingual School: Choices, Risks, and Dilemmas* is for teachers and teacher educators working in communities that educate children who do not speak English as a first language. At the center of the book are findings from a four-year critical ethnographic case study of a Canadian high school with a large number of emigrant students from Hong Kong and rich descriptions of the multitude of ways teachers and students thought about, responded to, and negotiated the issues and dilemmas that arose. The solutions and insights they derived from their experiences of working across linguistic, cultural, and racial differences will be extremely valuable to educators in other locales that have become home

to large numbers of immigrant families. The book is designed to help readers think about how the issues and dilemmas in the case study manifest themselves in their own communities and how to apply the insights they gain to their own teaching and learning contexts: * Each chapter includes four components: an excerpt from the ethnographic study; an analytic commentary on the ethnographic text drawn from a variety of theoretical perspectives and academic disciplines (including interactionist sociolinguistics, language minority education, English as a Second Language education, critical literacy, anti-racist education, and critical teacher education); a pedagogical discussion; and suggestions for further reflection and discussion. * The book features the use of ethnographic play writing to engage readers with the issues that arise in multicultural/multilingual schools. The author's play Hong Kong, Canada is included in its entirety and is used to stimulate further discussion of the issues raised in each of the chapters. * Although it is organized around two different kinds of schooling dilemmas--dilemmas of speech and silence, and dilemmas of discrimination--everyday dilemmas of curriculum and assessment are also discussed throughout the book. * A methodological discussion of the choices the author made while designing, conducting, and writing up the critical ethnographic case study makes the book useful in

qualitative research methodology courses. * A set of strategies and activities is provided for helping students develop English oral presentation skills.

Dual Coding for Teachers Jul 27 2020 As part of
the discovery of cognitive science, teachers are
waking up to the powers of dual coding -
combining words with visuals in your teaching.
But cognitive scientists aren't graphic
designers, and so their books don't show teachers
how to be competent in producing effective
visuals. There is a huge gap between what we know
about dual coding and the skills needed to
practice it effectively in the classroom. Until
now. Dual Coding With Teachers is a breakthrough
educational book. No other book has been designed
with both cognitive science and graphic
principles in mind. Every page contains diagrams,
infographics, illustrations and graphic
organisers. The book is designed to cater for
both the busy teacher in a rush, as well as the
research-hungry colleague. Over 35 teachers,
teacher developers, psychologists and information
designers are profiled, each with a double-page
spread, highlighting their dual coding
practice. The author, Oliver Caviglioli, is
uniquely placed to bridge the gap between
education and graphic design. A former special
school head teacher, Oliver learned design

principles from an early age from his architect and typographer father. Four decades of reading educational research has found its visual expression in this spectacular, image-rich book.

Rapid Training Development Sep 21 2022 Rapid Training Development Professionals who develop training courses know that during the challenging developmental phase of the five-part Instructional Systems Design Analysis, Design, Development, Implementation, and Evaluation the actual learning materials are created. The development phase is at the very heart of building a successful training program. They also know that creating learning materials can be an extremely time-consuming process. Rapid Training Development offers a much-needed resource that outlines rapid approaches and handy techniques for creating effective learning materials that get results. Written by George M. Piskurich, a leader in organizational learning, this vital book is a hands-on guide for developing training courses that can be delivered in a variety of ways in the classroom, on-the-job-training, asynchronous and synchronous e-learning, structured mentoring or the newest mobile technologies. The book is filled with practical tips, guidelines, and shortcuts that are targeted to each of the various training delivery systems. Rapid Training Development explains what is (and what isn't) course development and provides a wealth of general rapid course development techniques and suggestions for all types of

course development. Filled with illustrative examples, the book shows how various rapid development techniques can be applied in real-life training development situations. The author explores the use of various techniques for rapid course development such as self-directed learning and performance tools. The book also includes the most current delivery system approaches such as e-learning and popular mobile technologies podcasting and PDA-based learning. *Rapid Training Development* is a hands-on guide for doing it faster, doing it easier, and doing it right.

Options for Restructuring the Federal Employment and Training System Dec 24 2022 These

Congressional hearings contain testimony regarding options for restructuring the federal employment and training system. Representatives of the following agencies and organizations

provided testimony at the hearings: National Commission on Employment Policy; Health, Education and Human Services Division, Education and Employment Issues, U.S. General Accounting Office; Employment, Housing, and Aviation Subcommittee; Minnesota Teamster Service Bureau; and New York State Job Training Partnership Council. Among the topics discussed during the hearings were the following: duplication of services by existing programs; benefits and drawbacks of consolidating existing federal programs; the availability and adequacy of information about the outcomes and effectiveness of individual programs; efforts directed toward comprehensive planning and programming from 1960-1994; ways in which selected legislative proposals address concerns regarding multiple federal employment training programs; the state of New York's GATEWAY initiative and Workforce Preparation Evaluation Act; and efforts of the Minnesota Teamsters Service Bureau to assist dislocated workers, improve workplace literacy, and prepare tomorrow's workers.
