Mentoring and Supervision in Healthcare Sep 21 2020 This practical and accessible book examines the knowledge base, skills and attitudes required for mentoring in the context of healthcare. Revised and updated to take account of the latest developments in healthcare, the text explores theories and research on mentoring by analysing their strengths and weaknesses. To complement his analytical style, Neil Gopee has introduced more interactive features to emphasise the application of theories and principles to various clinical settings. He also draws on the most recent standards and competencies for mentors and supervisors, and examines how they can be applied in day-to-day mentoring and clinical practice activities. Key features include: - Comprehensive content - examines learning styles; different learning environments; evidence-based care; principles of assessment; the mentor's leadership; evaluation of teaching. - Practice-oriented - case studies offer links to 'real-life' and the chapters provide effective frameworks for mentoring in

practice. - Interactive - activities and think points encourage the reader to explore and apply concepts to their practice and roles. - Up-to-date - firmly based on current knowledge in the field. Mentoring and Supervision in Healthcare is a core text for mentor preparation courses in nursing, midwifery and across the healthcare sector. It supports learning and ongoing professional development for all healthcare professionals.

Strengthening School Counselor Advocacy and Practice for Important Populations and Difficult Topics 18 2020 School counselors often struggle to feel confident in delivering effective assistance to students due to a variety of reasons that currently do not have enough research or information developed. This leads to a struggle for counselors to adequately address tough and relevant issues. With these issues remaining unaddressed, or addressed less effectively, there is a concern that school counselors cannot mitigate the issues due to not being adequately informed. This can lead to a lifetime of consequences for students. Strengthening School Counselor Advocacy and Practice for Important Populations and Difficult Topics presents emerging research that seek to answer the tough and often unaddressed questions, target present-day issues of student populations, and prepare school counselors to feel confident and competent in their counseling and advocacy practice. These chapters, using the newest information available, will address these concerns and provide the best counseling work possible for underserved populations. While covering research on counseling for students with chronic illnesses, mixed-statuses, family issues, minority students, LGBTQ+ youth, and more, this book is ideal for school counselors, counseling educators, practitioners, stakeholders, researchers, academicians, and students who are interested in school counseling and meeting the needs of diverse and important populations of students.

Research for Designers Aug 21 2020 Design is everywhere. It influences how we live, what we wear, how we communicate, what we buy, and how we behave. To design for the real world and define strategies rather than just implement them, you need to learn how to understand and solve complex, intricate and often unexpected problems. Research for Designers is the guide to this new, evidence-based creative process for anyone doing research in Design Studies or looking to develop their design research skills. The book: Takes an organized

approach to walking you through the basics of research. Highlights the importance of data. Encourages you to think in cross-disciplinary way. Including interviews with 10 design experts from across the globe, this guide helps you put theory into practice and conduct successful design research.

Rights-based Integrated Child Protection Service Delivery Systems Nov 23 2020 The Sourcebook-IV provides training modules for rights-based integrated child protection service delivery systems at the secondary and tertiary prevention levels. Part 1 of the Sourcebook focuses on the preventative, comprehensive, integrated and systemic, and universal community-based and family-based service delivery systems for children; and the methods of case management and outcomes-based project cycle. Part 2 discusses children and families at risk and the role of community-based Integrated Childcare and Support Centres for providing supplementary care and support services to them at the secondary prevention level. It also focuses on children facing sociolegal problems such as deprivation of parental care, violence, and conflict with law, and the role of District-based Integrated Child Protection Centres for providing protection, justice and rehabilitation to them at the tertiary prevention level. Part 3 focuses on children in emergencies in general and in specific situations and role of Integrated Child Protection Centres in these situations. This is a necessary read for social workers, lawyers, researchers, trainers and teachers working on child rights across the world and especially in developing countries.

The Nurse Practitioner in Urology Sep 02 2021 This book is designed to meet the needs of nurse practitioners, advanced practice nurses and also physician assistants, working in

urology. The full range of domains of practice is covered, including assessment and diagnosis, clinical management, nurse practitioner and patient relationships, consultation, health promotion and disease prevention, and practice management and research. Some background knowledge is assumed regarding the normal anatomy and physiology of the genitourinary system and the pathophysiology underlying specific urologic health-related problems. The Nurse Practitioner in Urology will be invaluable in ensuring that the nurse practitioner is able to maintain exemplary management of patients with acute and chronic urologic conditions in a wide variety of settings, including independent practices, hospitals, and academic urologic practices. It explains fully the role of the nurse practitioner as a skilled clinician in urology, blending nursing and medical management and capable of managing many chronic nonoperative urologic conditions while recognizing those conditions which may benefit from surgical management. As populations continue to age worldwide, there is no doubt that the provision of advanced urologic care by nurse practitioners is an area that will continue to expand, benefiting from additional training and expertise. ?

Davidson's Principles and Practice of Medicine E-Book 09
2022 More than two million medical students, doctors and other health professionals around the globe have owned a copy of Davidson's Principles and Practice of Medicine since it was first published. Now in its 23rd Edition, this textbook describes the pathophysiology and clinical features of the most frequently encountered conditions in the major specialties of adult medicine and explains how to recognise, investigate, diagnose and manage them. Taking its origins from Sir Stanley Davidson's much-admired lecture notes, Davidson's has endured because it keeps pace with how modern medicine is taught and provides a wealth of information in an easy-to-read, concise and beautifully illustrated format. This book will serve readers everywhere as a core text that integrates medical science with clinical medicine, conveying key knowledge and practical advice in a highly accessible and readable format. The opening section describes the fundamentals of genetics, immunology, infectious diseases and population health, and discusses the core principles of clinical decision-making and good prescribing. A new second section on emergency and critical care medicine encompasses poisoning, envenomation and environmental medicine, and introduces a new chapter on acute medicine and critical illness. The third section covers the major medical specialties, each thoroughly revised and brought fully up to date. Two new chapters on maternal and adolescent/transition medicine complement the one on ageing and disease. A new chapter on medical ophthalmology has been included. Clinical Examination overviews summarise the

main elements for each system and now feature in the biochemistry, nutrition and dermatology chapters. Presenting Problems sections provide a clear pathway for the assessment of and approach to the most common complaints in each specialty. Practice Point summaries detail the practical skills that medical students and junior doctors must acquire. Emergency boxes emphasise the core knowledge needed to manage acutely ill patients. In Old Age, In Pregnancy and In Adolescence boxes highlight differences in the practice of medicine in these patient groups, and illustrate the interfaces between medical, obstetric and paediatric services. The text is extensively illustrated, with over 1000 diagrams, clinical photographs, and radiology and pathology images. The global perspective is enhanced by an International Advisory Board of experts from 17 countries, and by authors from around the world.

Introduction to Occupational Therapy- E-Book 14 2020 A complete overview of the profession and the practice of occupational therapy, Introduction to Occupational Therapy, 4th Edition prepares you for the roles, responsibilities, and relationships of the OT practitioner. This edition incorporates the latest revisions of the Occupational Therapy Practice Framework, which defines the OT process and areas of concern. Discussions also include treatment settings, occupational therapy across the lifespan, and evaluation, intervention, and outcomes within the OT process. Written by OT expert Jane Clifford O'Brien, this edition also keeps you current with emerging topics such as working with culturally diverse patients, evidence-based practice, and new practice areas such as driving and obesity. Coverage of different OT

practice areas (e.g., adult, geriatric, pediatric, and mental health) prepares you for the variety of clients you will encounter in clinical practice. An emphasis on evidence-based practice helps you think logically and use the literature to form a basis for diagnoses and treatment plans. Case studies and activities in each chapter promote problem-solving skills and demonstrate concepts. The OT Practice Framework and reimbursement mechanisms are addressed in terms of the occupational therapy process, providing a sound basis for decision making. A broad perspective on OT practice fits the needs of both occupational therapy and occupational therapy assistant students. Chapter objectives, key terms, chapter summaries, and review questions highlight important content in each chapter. A companion Evolve website includes video clips, review questions with answers, crossword puzzles, and additional case studies. NEW! The latest revisions to the Occupational Therapy Practice Framework are incorporated throughout the book, keeping you current with today's OT theories and practice. NEW cultural content prepares you to meet the needs of diverse clients. NEW discussions of the Centennial Vision provide a "big picture" view of occupational therapy and its changes as the profession reaches the age of 100.

Better Feedback for Better Teaching May 28 2021 A practical, research-based guide for ensuring trustworthy classroom observations that provide teachers with meaningful feedback. Better Feedback for Better Teaching is an essential resource for school, district, and state, leaders committed to high-quality classroom observations. This practical guide outlines the knowledge and skills classroom observers need to identify and help develop effective teaching, and explains how leaders can best facilitate the development of classroom observers. The best way to ensure high quality instruction in every classroom is to provide teachers with accurate, constructive feedback on practices proven to enhance student learning. Skilled classroom observers help teachers do their best work, so that they can guide students to their greatest potential. Better Feedback for Better Teaching provides helpful, reliable strategies from leading experts and practitioners involved in the

Measures of Effective Teaching (MET) project, which carried out one of the largest, most influential studies of classroom observations to date. Among the many topics covered, Better Feedback for Better Teaching describes how to: Build a shared vision of effective teacher feedback among observers Ensure a common understanding of a classroom observation tool Train observers to collect objective evidence from a lesson, efficiently and free of bias Leverage data to improve how observers are trained and supported This comprehensive resource includes helpful starting points, as well as tips to refine techniques and address new challenges. Each section combines clear explanations of key ideas with concrete, adaptable examples and strategies. Self-assessments are included to help you quickly rank current needs and find the most relevant solutions. Filled with valuable, practical tools, Better Feedback for Better Teaching helps educators cultivate high-quality classroom observations that improve teaching and learning.

New Technologies for Human Rights Law and Practice 2021
New technological innovations offer significant opportunities to promote and protect human rights. At the same time, they also pose undeniable risks. In some areas, they may even be changing what we mean by human rights. The fact that new technologies are often privately controlled raises further questions about accountability and transparency and the role of human rights in regulating these actors. This volume - edited by Molly K. Land and Jay D. Aronson - provides an essential roadmap for understanding the relationship between technology and human rights law and practice. It offers cutting-edge analysis and practical strategies in contexts as diverse as

autonomous lethal weapons, climate change technology, the Internet and social media, and water meters. This title is also available as Open Access.

According to the Book Jun 11 2022 How are curriculum policies translated into opportunities to learn in the classroom? According to the Book presents findings from the largest cross-national study of textbooks carried out to date - the curriculum analysis of the 1995 Third International Mathematics and Science Study (TIMSS). This study included a detailed, page-by-page, inventory of the mathematics and science content, pedagogy, and other characteristics collected from hundreds of textbooks in over forty countries. Drawing on these data, the authors investigate the rhetorical and pedagogical features of

textbooks to understand how they promote and constrain educational opportunities. They investigate how textbooks are constructed and how they structure diverse elements into prescriptions for teaching practice. The authors break new ground in understanding textbooks in terms of different educational opportunities that they make possible. The book examines policy implications from these new understandings. In particular, conclusions are offered regarding the role of textbooks in curriculum-driven educational reform, in light of their role as promoters of qualitatively distinct educational opportunities.

The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition May 30 2021 Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area.

A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline

also provides guidance to clinicians on implementing these recommendations to enhance patient care.

The Theory and Practice of Online Learning Aug 12 2022 "Neither an academic tome nor a prescriptive 'how to' guide, The Theory and Practice of Online Learning is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations."--BOOK JACKET.

Critical Expressivism Oct 23 2020 Critical Expressivism is an ambitious attempt to re-appropriate intellectual territory that has more often been charted by its detractors than by its proponents. Indeed, as Peter Elbow observes in his contribution to this volume, "As far as I can tell, the term

'expressivist' was coined and used only by people who wanted a word for people they disapproved of and wanted to discredit." The editors and contributors to this collection invite readers to join them in a new conversation, one informed by "a belief that the term expressivism continues to have a vitally important function in our field."
