5-Step TOEFL Prep for Hindi Speakers Nov 04 2021 An effective program for preparing to take the TOEFL (Test of English as a Foreign Language) exam, especially for Hindi speakers. Ideal for group or self -study. Answer key is included in this edition. An advanced grammar course, appropriate for pre-iBT, ITP paper-based TOEFL prep and English Teacher Training. Here, for the first time, a unique approach to preparing to take the TOEFL exam--especially for Hindi speakers. Focused on the Grammar section with five steps, this program also includes strategies for the Listening Comprehension section, guidelines for success in the Reading section, and expert tips and sample topics for the iBT Written Essay. Includes useful appendices for reference. To see useful Amazon book reviews, kindly refer to the listing for "TOEFL Prep for Spanish Speakers", the original book on which this title is based. For info. on all 12 titles in this series, visit www.5steptoeftlprep.com.

Handbook of Linguistic Annotation Dec 17 2022 This handbook offers a thorough treatment of the science of linguistic annotation. Leaders in the field guide the reader through the process of modeling, creating an annotation language, building a corpus and evaluating it for correctness. Essential reading for both computer scientists and linguistic researchers. Linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications. Part one of this book covers all phases of the linguistic annotation process, from annotation scheme design and choice of representation format through both the manual and automatic annotation process, evaluation, and iterative improvement of annotation accuracy. The second part of the book includes case studies of annotation projects across the spectrum of linguistic annotation types, including morpho-syntactic tagging, syntactic analyses, a range of semantic analyses (semantic roles, named entities, sentiment and opinion), time and event and spatial analyses, and discourse level analyses including discourse structure, co-reference, etc. Each case study addresses the various phases and processes discussed in the chapters of part one.

Argument Structure in Hindi Apr 28 2021 Conception of linguistic organisation involving the factorisation of syntactically relevant information into at least four parallel dimensions of structure.

Official Noting & Drafting (Eng-Hindi) Jun 30 2021 Ever since HND gained the status of the official language ,the moral responsibility of making the language acceptable in perfect administrative form has gradually increased. For the growth, development and expansion of HND, this book is a positive endeavour. As for official purposes, Government officials and employees are deeply enamoured of English in official transactions and failed to accept HND seriously. It is because of a lack of confidence to use proper words or sentences in HND. This book would enlighten the readers about the fact that each official English expression has an HND equivalent to it. The book is meant for those (particularly for English speaking individuals) who are in government offices, industrial houses, corporate business, private establishments, banks, railways or LIC, etc where the need to communicate in HND arises from time to time. The book offers the reader valuable techniques on how to structure the language. Salient features include: *Gazette Notifications. *Administrative Notings. *Accounts & Audit Notings & Objections. *Draft Telegrams. *Synonyms of Secret Reports. *Adjective Terminology. And many more useful tips. #v&spublishers

An Indian Political Life Feb 07 2022 An Indian Political Life: Charan Singh and Congress Politics, 1937 to 1961 focuses on the role of Charan Singh in the politics of the period while providing a broader perspective on the major issues, controversies, and developments of the time. The book is the result of a careful study of Charan Singh's personal collection of political files coupled with a series of extensive interviews with politicians, public personalities, and local people. It provides an account of the principal issues and events of the period, including Hindu-Muslim relations, the

conflict between the Nehruvian goal of rapid industrialization and the desires of those favoring primary attention to agriculture, issues of law and order, the rise of corruption and criminality in politics, the place of caste and status in a modernizing society, and the pervasive factional politics characteristic of the era. This work is much more than the biography of an important politician; it is also an analysis of issues, movements, and political conflicts that marked the late pre-Independence and early post-Independence era. This book is the first volume of a multi-volume work on The Politics of Northern India: 1937 to 1987.

Vishveshvaranand Indological Journal Aug 13 2022

Proceedings of the Third International Conference on Microelectronics, Computing and Communication Systems Sep 14 2022 The book presents high-quality papers from the Third International Conference on Microelectronics, Computing & Communication Systems (MCCS 2018). It discusses the latest technological trends and advances in MEMS and nanoelectronics, wireless communications, optical communication, instrumentation, signal processing, image processing, bioengineering, green energy, hybrid vehicles, environmental science, weather forecasting, cloud computing, renewable energy, RFID, CMOS sensors, actuators, transducers, telemetry systems, embedded systems, and sensor network applications. It includes papers based on original theoretical, practical and experimental simulations, development, applications, measurements, and testing. The applications and solutions discussed in the book provide excellent reference material for future product development.

Hindu Mahasabha in Colonial North India, 1915-1930 Dec 13 2019 Hindu nationalism has emerged as a political ideology represented by the Hindu Mahasabha. This book explores the campaign for Hindu unity and organisation in the context of the Hindu-Muslim conflict in colonial north India in the early twentieth century. It argues that India's partition in 1947 was a result of the campaign and politics of the Hindu rightwing rather than the Islamist politics of the Muslim League alone. The book explains that the Mahasabha articulated Hindu nationalist ideology as a means of constructing a distinct Hindu political identity and unity among the Hindus in conflict with the Muslims in the country. It looks at the Mahasabha's ambivalence with the Indian National Congress due to an extreme ideological opposition, and goes on to argue that the Mahasabha had its ideological focus on an anti-Muslim antagonism rather than the anti-British struggle for India's independence, adding to the difficulties in the negotiations on Hindu-Muslim representation in the country. The book suggests that the Mahasabha had a limited class and regional base and was unable to generate much in the way of a mass movement of its own, but developed a quasi-military wing, besides its involvement in a number of popular campaigns. Bridging the gap in Indian historiography by focusing on the development and evolution of Hindu nationalism in its formative period, this book is a useful study for students and scholars of Asian Studies and Political History.

Learn The C Book: Programming in C Language, C Programming in Hindi Jun 18 2020 Programming in C Language is the easiest to learn and once you have a good grounding in it, you can move on to another, more complicated language. Programming in C Language is a beautiful computer language. It is simple, and it is intuitive. Programming in C Language is used by a sorts of people – data scientists use it for much of their number crunching and analytics; security testers use it for testing out security and IT attacks; it is used to develop high-quality applications and many of the large applications. In this book, you are going to learn what the Programming in C Language entails, how to write conditions, expressions, statements and even commands, for the language to perform its functions efficiently. Are you interested in learning Programming in C Language? Then settle in and learn the basics in just 7 days - enough for you to be comfortable in moving on to the next level without any trouble. Are you interested in learning Programming in C Language? Then settle in and learn the basics in just 7 days - enough for you to be comfortable in moving on to the next level without any trouble. In this book you'll learn: · What Is The C Language? · Setting Up Your Local Environment · The C Structure and Data Type · C Constants and Literals · C Storage Classes · Making Decisions In C · The Role Of Loops In C Programming · Functions in C Programming · Structures and Union in C · Bit Fields and Typedef Within C. · C Header Files and Type Casting · Benefits Of Using The C Language · and much more! Hindi Sep 21 2020 This book presents the structure of Hindi keeping in view the sociolinguistic context of language use. It includes descriptions of sounds, devices of word formation, rules of phrase and sentence construction and conventions of language use in spoken and written texts incorporating the insights gained by application of recent linguistic theories. The account presented here, however, is free from abstruse technical vocabulary and modes of presentation that aim at justifying a particular linguistic model. This volume is primarily designed as a source of reference for linguists and educators who want to be better informed about the forms and functions of Hindi, and a resource for students and teachers of Hindi. Hindi, the official language of the Republic of India, is the second most widely spoken language with approximately three hundred and fifty million speakers. In its diasporic contexts, it is spoken in Africa, Australia, Europe, Fiji, Guyana, Surinam, Trinidad, United Arab Emirates, United Kingdom and United States. An Indo-European language by genetic affiliation, Hindi shares many characteristics with Austro-Asiatic, Dravidian, and Sino-Tibetan languages of the subcontinent. In addition, Hindi has assimilated features of Arabic, Persian and English in a variety of its functionally determined styles.

A to Z in Hindi by Vidya Nahar - Volume 2 Jan 14 2020 This volume contains topicwise vocabulary lists from P - Z in Hindi, such as pronouns, questions, relationships in Hindi (English words are listed alphabetically under each topic with transliteration in English and translation in Hindi). These vocabulary lists are helpful learning and reference tools for learners of Hindi everywhere.

Building and Using Comparable Corpora Feb 13 2020 The 1990s saw a paradigm change in the use of corpus-driven methods in NLP. In the field of multilingual NLP (such as machine translation and terminology mining) this implied the use of parallel corpora. However, parallel resources are relatively scarce: many more texts are produced daily by native speakers of any given language than translated. This situation resulted in a natural drive towards the use of comparable corpora, i.e. non-parallel texts in the same domain or genre. Nevertheless, this research direction has not produced a single authoritative source suitable for researchers and students coming to the field. The proposed volume provides a reference source, identifying the state of the art in the field as well as future trends. The book is intended for specialists and students in natural language processing, machine translation and computer-assisted translation.

Using Computers in Linguistics Aug 01 2021 Computing has had a dramatic impact on the discipline of linguistics and is shaping the way we conceptualize both linguistics and language. Using Computers in Linguistics provides a non-technical introduction to recent developments in linguistic computing and offers specific guidance to the linguist or language professional who wishes to take advantage of them. Divided into eight chapters, each of the expert contributors focus on a different aspect of the interaction of computing and linguistics looking either at computational resources: the Internet, software for fieldwork and teaching linguistics, Unix utilities, or at computational developments: the availability of electronic texts, new methodologies in natural language processing, the development of the CELLAR computing environment for linguistic analysis.

Introduction to UK Law: English to Hindi Law Dictionary and Exercise Book Dec 25 2020 Improve your UK law vocabulary with this unique English to Hindi UK law dictionary and exercise book. Written by an English qualified lawyer and legal English teacher, this law dictionary helps to improve and practise legal English vocabulary, grammar and everyday use. This dictionary and exercise book is perfect for self-study and includes all major areas of law and concentrates on everyday use of legal English. The book provides help with phrasal verbs, collocations and practical use of legal terminology. Written in plain English to assist understanding, the dictionary and exercise book covers legal systems, court procedures, commercial contracts, company law, tort and litigation.

Applied Machine Learning for Smart Data Analysis May 18 2020 The book focuses on how machine learning and the Internet of Things (IoT) has empowered the advancement of information driven arrangements including key concepts and advancements. Ontologies that are used in heterogeneous IoT environments have been discussed including interpretation, context awareness, analyzing various data sources, machine learning algorithms and intelligent services and applications. Further, it includes unsupervised and semi-supervised machine learning techniques with study of semantic analysis and thorough analysis of reviews. Divided into sections such as machine learning, security, IoT and data mining, the concepts are explained with practical implementation including results. Key Features Follows an algorithmic approach for data analysis in machine learning Introduces machine learning methods in applications Address the emerging issues in computing such as deep learning, machine learning, Internet of Things and data analytics Focuses on machine learning techniques namely unsupervised and semi-supervised for unseen and seen data sets Case studies are covered relating to human health, transportation and Internet applications

Guide to OCR for Indic Scripts Jan 06 2022 This is the first comprehensive text on Optical Character Recognition for Indic scripts. It covers many topics and describes OCR systems for eight different scripts—Bangla, Devanagari, Gurmukhi, Gujarti, Kannada, Malayalam, Tamil and Urdu.

Advances in Multilingual and Multimodal Information Retrieval Aug 21 2020 This book constitutes the thoroughly refereed proceedings of the 8th Workshop of the Cross-Language Evaluation Forum, CLEF 2007, held in Budapest, Hungary, September 2007. The revised and extended papers were carefully reviewed and selected for inclusion in the book. There are 115 contributions in total and an introduction. The seven distinct evaluation tracks in CLEF 2007, are designed to test the performance of a wide range of multilingual information access systems or system components. The papers are organized in topical sections on Multilingual Textual Document Retrieval (Ad Hoc), Domain-Specific Information Retrieval (Domain-Specific), Multiple Language Question Answering (QA@CLEF), cross-language retrieval in image collections (Image CLEF), cross-language speech retrieval (CL-SR), multilingual Web retrieval (WebCLEF), cross-language

geographical retrieval (GeoCLEF), and CLEF in other evaluations.

Sword of Shiva Oct 11 2019 Another high-stakes military techno thriller from the award-winning author of 'Sea of Shadows' and 'The Seventh Angel' Three Tibetan rebels attack a train carrying Chinese soldiers into the Tibet Autonomous Region. The rebels escape across the Himalayas into India, unaware that the son of China's First Vice-Premier lies maimed and dying among the burning wreckage of the train. As an escalating series of retaliations drive China and India toward outright war, hostilities spill over into the sea, and the Bay of Bengal becomes a crucible of naval warfare. The president of the United States orders a U.S. Navy strike group into the area as a stabilizing force, but the situation between the two nations has already deteriorated beyond any hope of peaceful resolution. With Asia hovering on the brink of annihilation, a small force of U.S. warships must defeat the Chinese Navy to preempt the coming firestorm. A SINGLE SPARK CAN IGNITE A WAR THAT CONSUMES THE WORLD. The fuse has already been lit... "High stakes on the high seas. A riveting drama of 21st century warfare ripped from tomorrow's headlines. Jeff Edwards proves again that he is the undisputed master of the modern naval thriller." -- DIRK CUSSLER, Bestselling author of 'Crescent Dawn,' and 'Poseidon's Arrow' "A fantastic and chilling take on how close to the edge of disaster our world actually might be. The adrenaline-fueled writing sends you hurtling forward like a missile." -- GRAHAM BROWN, International bestselling author of 'The Storm,' and 'The Eden Prophecy' "Impossible to put down! Jeff Edwards has produced another spellbinder that puts you there! ...eerily prescient about where the next world war will begin." -- GEORGE GALDORISI, New York Times bestselling author of 'Act of Valor,' and 'The Coronado Conspiracy'

The art of Self Publishing and Website creation Mar 08 2022 This book is a compilation of Premyogi vajra's blog posts that he has created for demystifyingkundalini.com. Premyogi vajra is a self-aware and mysterious person. With his Kundalini awakening, there was a flood of high mentality in his brain. Impressed by that, he created many books and the above website. Regarding his experiences related to book-publishing and website-making, he made them known as his blog posts. A separate chapter has been created for each article. Readers will surely find this e-book interesting, informative and comfortable to read. Knowledge sharing is a fundamental tool to grow a society. Experience gained without subsequent sharing is of little value. It remains confined to a single man and gets perished with him. Therefore, to be able to properly and easily share one's experiences, one must know at least basics of self publishing and website creation for these are basic modern tools of sharing knowledge. Writer had to deal with great deal of hassel while learning self publishing and website creation. He took many years to learn their basic tips. So that people do not get suffered like himself, he compiled all tips he got while learning these in form of this book. Hope that people will find this book brief, practical and easy. Friends, if the art of sharing experiences with everyone is not learned, then those experiences would not have special significance. Those experiences remain confined to that single man, and perish with him. In today's times, websites and e-books are the most important means of sharing experiences. Therefore, it is important for everyone to have basic knowledge of website creation and self-publication. This book serves very well the same purpose of achieving this goal.

Congress on Intelligent Systems May 30 2021 This book is a collection of selected papers presented at the First Congress on Intelligent Systems (CIS 2020), held in New Delhi, India during September 5 – 6, 2020. It includes novel and innovative work from experts, practitioners, scientists and decision-makers from academia and industry. It covers topics such as Internet of Things, information security, embedded systems, real-time systems, cloud computing, big data analysis, quantum computing, automation systems, bio-inspired intelligence, cognitive systems, cyber physical systems, data analytics, data/web mining, data science, intelligence for security, intelligent decision making systems, intelligent information processing, intelligent transportation, artificial intelligence for machine vision, imaging sensors technology, image segmentation, convolutional neural network, image/video classification, soft computing for machine vision, pattern recognition, human computer interaction, robotic devices and systems, autonomous vehicles, intelligent control systems, human motor control, game playing, evolutionary algorithms, swarm optimization, neural network, deep learning, supervised learning, unsupervised learning, fuzzy logic, rough sets, computational optimization, and neuro fuzzy systems.

Smart Techniques for a Smarter Planet Mar 28 2021 This book is intended to provide a systematic overview of so-called

smart techniques, such as nature-inspired algorithms, machine learning and metaheuristics. Despite their ubiquitous presence and widespread application to different scientific problems, such as searching, optimization and /or classification, a systematic study is missing in the current literature. Here, the editors collected a set of chapters on key topics, paying attention to provide an equal balance of theory and practice, and to outline similarities between the different techniques and applications. All in all, the book provides an unified view on the field on intelligent methods, with their current perspective and future challenges.
