Since 1971, the International Congress for Neo-Latin Studies has been organised every three years in various cities in Europe and North America. In August 2009, Uppsala in Sweden was the venue of the fourteenth Neo-Latin conference, held by the International Association for Neo-Latin Studies. The proceedings of the Uppsala conference have been collected in this volume under the motto *Litteras et artes nobis traditas excolere* Reception and Innovation. Ninety-nine individual and five plenary papers spanning the period from the Renaissance to the present offer a variety of themes covering a range of genres such as history, literature, philology, art history, and religion. The contributions will be of relevance not only for scholarly readers, but also for an interested non-professional audience. Includes list of members. La ricerca è stata condotta sui castelli e i borghi murati presenti nel Molise occidentale tra X e XIV secolo allo scopo di individuare alcuni elementi fondamentali per la ricostruzione del quadro insediativo regionale: le vicende storico-politiche nelle quali sono inserite le fortificazioni, la loro ubicazione sul territorio, le caratteristiche tipologiche e costruttive delle singole strutture. L'autrice, sulla base dei dati ottenuti dall'analisi delle fonti scritte e della cartografia e con l'ausilio della toponomastica, ha proceduto alla ricognizione diretta degli insediamenti fortificati presenti sul territorio con caratteristiche molto differenziate. Di alcuni siti fortificati ormai scomparsi rimane solo l'attestazione toponomastica, di altri, abbandonati da tempo, i resti delle costruzioni originarie in vari stadi di conservazione, per altri, infine, le strutture, rimaneggiate e sono ancora oggi abitate e, ma trasformate nei secoli e, pertanto, di difficile lettura. Per ciascun sito è stata redatta una scheda che compendia tutte le informazioni sia di carattere geografico che storico che quelle relative agli elementi architettonici e i dati bibliografici. Every year, the Bibliography catalogues the most important new publications, historiographical monographs, and journal articles throughout the world, extending from prehistory and ancient history to the most recent contemporary historical studies. Within the systematic classification according to epoch, region, and historical discipline, works are also listed according to author's name and characteristic keywords in their title. Ross K. Dowling and David Newsome present an original, substantial and much-needed contribution to the field to further our understanding of geotourism in theory and practice. This Handbook defines, characterizes and explores the subject through a range of international perspectives and case studies, identifying geotourism as a rapidly emerging form of urban and regional sustainable development. With extensive case studies from North and South America, Europe, Asia, Australasia and Africa, this global Handbook examines and explains the relationship between geology and tourism. Thematically arranged sections cover the relationship of geology with tourism, sustainability and society, geotourism in urban areas, and interpretation and education strategies. The final two sections assess geotourism's impact through wide-ranging case studies of UNESCO global geoparks and geotourism in a range of countries. The eminent academics and practitioners demonstrate how geotourism is the future for engaging the public and protecting geosites, as well as emphasising the importance of sustainability. An essential resource for students and educators, this Handbook provides an international perspective for those interested in tourism, environmental geography, ecology and geology. Written with practitioners in mind, this book reveals how tourism professionals and geologists should each know about the nexus of their subjects. Through a close study of local demographics and topographies and primary source material in the form of tax returns and notarial records, this study considers the development of urban fabrics and patterns of piety, charity and patronage in Siena's southern contado during the thirteenth and fourteenth centuries. By extension, it also presents an analysis of the art and architecture of the region during this time. Italy in the Middle Ages was unique among the countries of Europe in recreating, in a changed environment, the urban civilization of antiquity - the society, culture, and political formations of city-states. This book examines the origins and nature of this phenomenon from the fall of Rome to the eve of its consummation, the Italian Renaissance. The explanation is sought in Italy's singular 'double existence' between two contrasted worlds - ancient and medieval. The ancient was characterised by the total predominance of the landed aristocracy in economy and society, enforced through a peculiar system of city states embracing town and country. The new medieval influences were marked by the separation of town, country and aristocracy, by the identification of towns with trade and a mercantile bourgeoisie, and by commercial and proto-industrial revolution. Italy shared in both worlds. It remained a land of cities and of an urbanized ruling class (except in the Norman South) and re-established territorial city states; but the states were very different from those of antiquity, the city leaders in the commercial revolution, and Italy itself seen as a nation of shopkeepers, birthplace of capitalism. In this fascinating and ground-breaking study, Philip Jones traces in detail the tension and interaction between the two traditions, civic and patrician, mercantile and bourgeois, through all phases of Italian life to their culmination in two rival regimes of communes and despots. This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners, in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration. Il volume 30 di «Archeologia e Calcolatori» si apre con un inserto speciale, dedicato al trentennale della rivista. Alle introduzioni di F. Djindjian e di P. Moscati, che delineano un quadro dell'informatica archeologica nel suo divenire, seguono gli articoli dei membri del Comitato di Redazione, a testimoniare l'attività di ricerca e di sperimentazione che ha caratterizzato il cammino editoriale della rivista, e il contributo di una giovane laureata dell'Università Bocconi, che ha lavorato a stretto contatto con il team di «Archeologia e Calcolatori». Nella parte centrale sono pubblicati gli articoli proposti annualmente dagli autori. Ne emerge un quadro che rappresenta gli aspetti applicativi più qualificanti dell'informatica archeologica (le banche dati, i GIS, le analisi statistiche, i sistemi multimediali), ma che guarda oggi con sempre maggiore interesse agli strumenti di visualizzazione

scientifica e di comunicazione delle conoscenze. Il volume si chiude con gli Atti del XII Workshop ArcheoFOSS (Free, Libre and Open Source Software e Open Format nei processi di ricerca archeologica), un'iniziativa lodevole, nata nel 2006, cui si è più volte dato spazio nelle pagine della rivista. A cavallo del primo millennio, in un momento segnato da sviluppo economico e da pericoli incombenti, mentre si vanno dissolvendo i regni postcarolingi, si assiste in Italia alla creazione ex novo di abitati difesi. Per almeno cinque secoli la presenza dei castelli, non solo influenza la multiforme variabilità degli insediamenti umani, ma si fa supporto di poteri locali che, supplendo alla perduta efficacia dell'autorità centrale, provvedono alla protezione delle popolazioni rurali e, nel contempo, le mantengono sottomesse. Il libro ripercorre le impronte lasciate dai castelli nel tessuto insediativo italiano nei secoli centrali del medioevo e le relazioni molteplici tra castelli e città, specialmente nel quadro di alcune specifiche realtà regionali, proponendo, infine, un consuntivo generale delle implicazioni fra gli aspetti più propriamente tecnici delle fortificazioni, la dinamica del popolamento rurale e lo svolgimento dell'attività militare. In the late Middle Ages, Italy was one of the most urbanized areas in Europe. Its coasts, the Apennines, the perialpine area and the plains were all home to a large number of smaller towns, lands, villages, castra, and 'quasi cites'. These settlements were all very diverse in terms of demographic consistency, social articulation and economic dynamism, but together they constituted a characteristic and constitutive element of the Italian historical identity: an 'original personality'. This volume, thanks to some framing essays and a mapping of individual cases involving most of the northern, central and southern regions, aims at investigating the active research on this topic over the last thirty to forty years. The first scholarly study covering the history of both the city and the region of Lucca, from classical antiquity to the end of the fifteenth century Incorporating the latest developments in the study of the period, a team of leading international scholars provides a fresh and dynamic picture of a period of great transformation in the political, cultural, and economic life of the Italian peninsula, which witnessed the rise of autonomous city states in the north, the creation of a powerful kingdom in the south, and the development of the Italian language as a vehicle for literary expression.
