This book, an essential text for hospitality management students, examines the relevance and applications of general management theory and principles to hospitality organizations. Using contemporary material and case studies, the book indicates ways in which performance may be improved through better use of human resources. Rigorous academic theory is related to hospitality practice, based on the authors' great knowledge of the hospitality industry. The text takes a vocational basis and the illustration of the theory with the real-life examples of hospitality management in action provides a solid and stimulating introduction to the subject. In Gary Brockwell's debut novel Eddie Dungen, children's entertainer and close hand magician, is bored with his life and of his wife Sally's preoccupation with cleaning and taking part in flawed 'get rich quick' schemes. His only respite from this marital entrapment comes in the form of regular forays to a secluded beach with his Collie-Spaniel cross, Henry. That is until one day when a chance encounter with a beautiful stranger named Cerys Sindon changes everything. As Sally's behaviour becomes increasingly erratic and causes her relationship with her husband to deteriorate, Eddie prepares to embark on the ultimate betrayal with the captivating Cerys. But the sudden death of his father figure and the sentiments of his good friend focus Eddie's attention on a reevaluation of what is central to his life and what will make him happy. In his desperate search for answers, Eddie is drawn into the world of the medium Ignatius McKenzie and the personal revelations he presents, which have far reaching implications for both

Eddie and Cerys, and a dark secret that she conceals. Inspired by the work of John Irving and Colin Bateman, Chasing the Sun with Henry explores the effect of tragedy and change on a relationship. Gary's thought-provoking novel will appeal to readers that enjoy contemporary fiction, especially those that are interested in relationships and the various guises of love. A new edition of the leading textbook on the economic history of Britain since industrialization. Combining the expertise of more than thirty leading historians and economists, Volume 1 tracks Britain's economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire. Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods. New approaches are proposed to classic issues such as the causes and consequences of industrialisation, the role of institutions and the state, and the transition from an organic to an inorganic economy, as well as introducing new issues such as globalisation, convergence and divergence, the role of science, technology and invention, and the growth of consumerism. Throughout the volume, British experience is set within an international context and its performance benchmarked against its global competitors.
