"[An] entertaining jaunt through city wildlife." —Kirkus Reviews We tend to think of cities as a realm apart, somehow separate from nature, but nothing could be further from the truth. In *Feral Cities*, Tristan Donovan digs below the urban gloss to uncover the wild creatures that we share our streets and homes with, and profiles the brave and fascinating people who try to manage them. Along the way readers will meet the wall-eating snails that are invading Miami, the boars that roam Berlin, and the monkey gangs of Cape Town. From feral chickens and carpet-roaming bugs to coyotes hanging out in sandwich shops and birds crashing into skyscrapers, *Feral Cities* takes readers on a journey through streets and neighborhoods that are far more alive than we often realize, shows how animals are adjusting to urban living, and asks what messages the wildlife in our metropolises have for us. Tristan Donovan is the author of two widely praised books, *Replay: The History of Video Games* and *Fizz: How Soda Shook Up the World*. His journalism has appeared in many major newspapers, magazines, and web sites. He has a degree in ecology. The bestselling authors of *Urban Jungle* delve into the many ways that nurturing plants helps nurture the soul This new book by the authors of the bestselling *Urban Jungle* addresses the life-changing magic of living with and caring for plants. Aimed at a wider audience than typical houseplant books, each chapter combines easily digestible plant knowledge, style guidance via real home interiors, and inspiring advice for using plants to increase energy, creativity, and well-being and to attract love and prosperity. Also included: real-world @urbanjungleblog followers' FAQs; a section on plants and pets; and plant care for the different stages of a houseplant's life. The focus

is on using plants to raise the positive energy of every room in the house and to live happily ever after with plants. Featured in the New York Times Book Review Summer Reading Guide * A Crime by the Book "Most Anticipated" Novel * Featured in the New York Post Summer Round Up * Starred Publishers Weekly Review * A Publishers Weekly "Big Summer Books" * A Kirkus Reviews "Creepy Thrillers" Pick In this pulse-pounding thriller from the author of the "haunting, twisting thrill ride" (Megan Miranda, New York Times bestselling author) *The River at Night*, a young woman leaves behind everything she knows to take on the Bolivian jungle, but her excursion abroad quickly turns into a fight for her life. Lily Bushwold thought she'd found the antidote to endless foster care and group homes: a teaching job in Cochabamba, Bolivia. As soon as she could steal enough cash for the plane, she was on it. When the gig falls through and Lily stays in Bolivia, she finds bonding with other broke, rudderless girls at the local hostel isn't the life she wants either. Tired of hustling and already world-weary, crazy love finds her in the form she least expected: Omar, a savvy, handsome local man who'd abandoned his life as a hunter in Ayachero—a remote jungle village—to try his hand at city life. When Omar learns that a jaguar has killed his four-year-old nephew in Ayachero, he gives Lily a choice: Stay alone in the unforgiving city, or travel to the last in a string of ever-more-isolated river towns in the jungles of Bolivia. Thirty-foot anaconda? Puppy-sized spiders? Vengeful shamans with unspeakable powers? Love-struck Lily is oblivious. She follows Omar to this ruthless new world of lawless poachers, bullheaded missionaries, and desperate indigenous tribes driven to the brink of extinction. To

survive, Lily must navigate the jungle--its wonders as well as its terrors—using only her wits and resilience. Primal, gripping, and terrifying, *Into the Jungle* features Erica Ferencik's signature "visceral, white-knuckle" (Entertainment Weekly) prose that will sink its fangs into you and not let go. Exotic trees in England and a rainforest in Zurich, a seed bank on the arctic island of Spitsbergen and urban agriculture in Tanzania, trade in old trees in China and biodiversity in Senegal. *Tree Nursery. Cultivating the Urban Jungle* uses the example of plant production throughout the world to demonstrate the manifold relationships that exist between human beings and nature. Numerous essays and detailed accounts examine current phenomena like desertification in the Sahel, greening projects in Shanghai and the genesis of rooftop gardens in London. Travelogues from Europe, Africa and Asia consider the role played by a range of economic and historical factors in the significant influence that tree nurseries have come to exercise on urban planning and landscape architecture. Not your usual poetry. Some relationship poems but mostly things that everyone tries in the big city. Easy to read and understand, but thought provoking. First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company. *Big Bamboo* is a fine art photography book which takes a unique look at life in our unmistakable home in the city of Hong Kong. Finished to the very highest quality, this is a book that every resident, visitor and lover of the city must have. *Urban Jungle Undated Daily Planner for 3 months (90+ days)*. Drama Capital: J-Mob is the masterfully written first novel in Hakim Arnold's Drama Capital trilogy. He takes you on an exciting ride through the urban jungle called Washington, D.C. and "the real Washington, D.C." This is a well-depicted tale of drug dealing, murder, sex, lies, and love. It entails everything that makes urban fiction so intriguing. David Miller, a.k.a. Gangsta-D, and Jack Stokes, a.k.a. Frost, were well known car thieves. Their lives were forever changed when by chance they stumbled across the dead bodies of two murdered Mexican males. After searching the house of the two murdered men, the two car thieves found thousands of dollars in cash and a duffel bag filled with pounds of marijuana. Jersey was a charismatic, womanizing, drug kingpin who had plans of retiring from the drug trade. He was introduced to Gangsta-D and Frost by Adalia, a close female friend. Jersey ended up giving Gangsta-D and Frost a place in Northwest, D.C. to sell their drugs. The story takes a violent turn when Adalia, who was Jersey's money collector, was robbed and her younger sister Sade shot. Jersey goes on a deadly rampage as he and his crew try to find and punish the men who were responsible for the robbery and shooting, while, simultaneously, Gangsta-D and Frost were using deadly force to rise to the top of the drug trade in Washington, D.C. From evolutionary biologist Menno Schilthuis, a book that will make you see yourself and the world around you in an entirely new way *Carrion crows in the Japanese city of Sendai have learned to use passing traffic to crack nuts. *Lizards in Puerto Rico are evolving feet that better grip surfaces like concrete. *Europe's urban blackbirds sing at a higher pitch than their rural cousins, to be heard over the din of traffic. How is this happening? Menno Schilthuis is one of a growing number of "urban ecologists" studying how our manmade environments are accelerating and changing the evolution of the animals and plants around us. In Darwin Comes to Town, he takes us around the world for an up-close look at just how stunningly flexible and swift-moving natural selection can be. With human populations growing, we're having an increasing impact on global ecosystems, and nowhere do these impacts overlap as much as they do in cities. The urban environment is about as extreme as it gets, and the wild animals and plants that live side-by-side with us need to adapt to a whole suite of challenging conditions: they must manage in the city's hotter climate (the "urban heat island"); they need to be able to live either in the semidesert of the tall, rocky, and cavernous structures we call buildings or in the pocket-like oases

of city parks (which pose their own dangers, including smog and free-ranging dogs and cats); traffic causes continuous noise, a mist of fine dust particles, and barriers to movement for any animal that cannot fly or burrow; food sources are mainly human-derived. And yet, as Schilthuizen shows, the wildlife sharing these spaces with us is not just surviving, but evolving ways of thriving. Darwin Comes to Town draws on eye-popping examples of adaptation to share a stunning vision of urban evolution in which humans and wildlife co-exist in a unique harmony. It reveals that evolution can happen far more rapidly than Darwin dreamed, while providing a glimmer of hope that our race toward over population might not take the rest of nature down with us. " A luxuriously illustrated coffee-table book, Wonderplants may have significant side effects. 'Urban Jungle' will be published in both English and German.

In this exhilarating look at cities, past and future, Ben Wilson proposes that, in our world of rising seas and threatening weather, the natural world may prove the city's savior • "Illuminating. . . Wilson leaves readers with hope about the future of efforts to preserve the ecosystems that surround us, as well as a new perspective that looks beyond the concrete and asphalt when walking along a city's streets."—AP Since the beginning of civilization, humans have built cities to wall nature out, then glorified it in beloved but quite artificial parks. In *Urban Jungle* Ben Wilson—the author of *Metropolis*, a seven-thousand-year history of cities that the *Wall Street Journal* called “a towering achievement”—looks to the fraught relationship between nature and the city for clues to how the planet can survive in an age of climate crisis. Whether it was the market farmers of Paris, Germans in medieval forest cities, or the Aztecs in the floating city of Tenochtitlan, pre-modern humans had an essential bond with nature. But when the day came that water was piped in and food flown from distant fields, that relationship was lost. Today, urban areas are the fastest-growing habitat on Earth and in *Urban Jungle* Ben Wilson finds that we are at last acknowledging that human engineering is not enough to protect us from extremes of weather. He takes us to places where efforts to rewild the city are under way: to Los Angeles, where the city's concrete river will run blue again, to New York City, where a bleak landfill will be a vast grassland preserve. The pinnacle of this strategy will be Amsterdam: a city that is its own ecosystem, that makes no waste and produces its own energy. In many cities, Wilson finds, nature is already thriving. Koalas are settling in Brisbane, wild boar may raid your picnic in Berlin. Green canopies, wildflowers, wildlife: the things that will help cities survive, he notes, also make people happy. *Urban Jungle* offers the pleasures of history—how backyard gardens spread exotic species all over the world, how war

produces biodiversity—alongside a fantastic vision of the lush green cities of our future. Climate change, Ben Wilson believes, is only the latest chapter in the dramatic human story of nature and the city.
