Back in the 1980s Jean Baudrillard wrote that public space was

collapsing due to a double obscenity: 'The most intimate operation of your life becomes the potential grazing ground of the media....The entire universe also unfolds unnecessarily on your home screen.' He termed this the ecstasy of communication. But today, your everyday life is not just the potential grazing ground of the media, but of anyone with a camera, and the entire universe unfolds not just at home but in the palm of your hand virtually anywhere you travel. Bringing together a transdisciplinary team of leading scholars and artists from North America, Europe and Asia, this volume documents and theorizes this new visibility. It focuses on the proliferation of a range of new visual technologies, examining questions of subjectivity, agency, and surveillance as well as mapping and theorizing new practices of visuality within this new visual assemblage.
New Visualities, New Technologies addresses the pressing need for the conceptual understanding of new forms of seeing, looking, presenting, and hiding.

As November stubs out the glow of autumn and the days tighten into shorter hours, winter's occupation begins. Preparing for winter has its own rhythms, as old as our exchanges with the land. Of all the seasons, it draws us together. But winter can be tough. It is a time of introspection, of looking inwards. Seasonal sadness; winter blues; depression--such feelings are widespread in the darker months. But by looking outwards, by being in and observing nature, we can appreciate its rhythms. We can learn to see and celebrate winter in all its shadows and lights. In this moving and lyrical evocation of a British winter and the feelings it inspires, Horatio Clare raises a torch against the darkness, illuminating the blackest corners of the season, and delving into memory and myth to explore the powerful hold that winter has on us. By learning to see, we can find the magic, the light that burns bright at the heart of winter: spring will come again. Debian GNU/Linux is one of the major Linux distributions available today.
