Txtng: The Gr8 Db8 Jan 29 2021 This book takes a long hard look at the text-messaging phenomenon and its effects on literacy, language, and society. Young people who seem to spend much of their time texting sometimes appear unable or unwilling to write much else. Media outrage has ensued. "It is bleak, bald, sad shorthand," writes a commentator in the UK Guardian. "It masks dyslexia, poor spelling, and mental laziness." Exam answers using textese and reports that examiners find them acceptable have led to headlines in the tabloids and leaders in the qualities. Do young people text as much as people think? Do adults? Does texting spell the end of literacy? Is there a panic in the media? David Crystal looks at the evidence. He investigates how texting began and who uses it, why and what for. He shows how to interpret its mix of pictograms, logograms, abbreviations, symbols, and wordplay, and how it works in different languages. He explores the ways similar devices have been used in different eras and discovers that the texting system of conveying sounds and meaning goes back a long way, all the way in fact to the origins of writing - and he concludes that far from hindering literacy, texting may turn out to help it. He doesn't have time for romance, no matter how incredible she looks without her clothes on. A mix-up means Aimee is accidentally given his cell number instead of his assistant's. So when she starts texting Noel about how much she hates him, he decides to have a little fun with her. The last thing he expects is for her to turn his world upside-down. But that's exactly what happens as the pair start sharing their deepest secrets and their greatest fears, and Noel discovers he can share so much more via text than he can in person. The Inside Text Nov 19 2022 SMS or Text is one of the most popular forms of messaging. Yet, despite its immense popularity, SMS has remained unexamined by science. Not only that, but the commercial organisations, who have been forced to offer SMS by a demanding public, have had very little idea why it has been successful. Indeed, they have, until very recently, planned to replace SMS with other messaging services such as MMS. This book is the first to bring together scientific studies into the values that 'texting' provides, examining both cultural variation in countries as different

as the Philippines and Germany, as well as the differences between SMS and other communications channels like Instant Messaging and the traditional letter. It presents usability and design research which explores how SMS will evolve and what is likely to be the pattern of person-to-person messaging in the future. In short, *The Inside Text* is a fundamental resource for anyone interested in mobile communications at the start of the 21st Century.

Clinical Text Mining Dec 28 2020 This open access book describes the results of natural language processing and machine learning methods applied to clinical text from electronic patient records. It is divided into twelve chapters. Chapters 1-4 discuss the history and background of the original paper-based patient records, their purpose, and how they are written and structured. These initial chapters do not require any technical or medical background knowledge. The remaining eight chapters are more technical in nature and describe various medical classifications and terminologies such as ICD diagnosis codes, SNOMED CT, MeSH, UMLS, and ATC. Chapters 5-10 cover basic tools for natural language processing and information retrieval, and how to apply them to clinical text. The difference between rule-based and machine learning-based methods, as well as between supervised and unsupervised machine learning methods, are also explained. Next, ethical concerns regarding the use of sensitive patient records for research purposes are discussed, including methods for de-identifying electronic patient records and safely storing patient records. The book's closing chapters present a number of applications in clinical text mining and summarise the lessons learned from the previous chapters. The book provides a comprehensive overview of technical issues arising in clinical text mining, and offers a valuable guide for advanced students in health informatics, computational linguistics, and information retrieval, and for researchers entering these fields.

Text and Act Feb 27 2021 Over the last dozen years, the writings of Richard Taruskin have transformed the debate about "early music" and "authenticity." *Text and Act* collects for the first time the most important of Taruskin's essays and reviews from this period, many of which now classics in the field. Taking a wide-ranging cultural view of the phenomenon, he shows that the movement, far from reviving ancient traditions, in fact represents the only truly

modern style of performance being offered today. He goes on to contend that the movement is therefore far more valuable and even authentic than the historical verisimilitude for which it ostensibly strives could ever be. These essays cast fresh light on many aspects of contemporary music-making and music-thinking, mixing lighthearted debunking with impassioned argumentation. Taruskin ranges from theoretical speculation to practical criticism, and covers a repertory spanning from Bach to Stravinsky. Including a newly written introduction, *Text and Act* collects the very best of one of our most incisive musical thinkers.

Natural Language Processing with Python Mar 19 2020 This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, *Natural Language Processing with Python* will help you: Extract information from unstructured text, either to guess the topic or identify "named entities" Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages -- or if you're simply curious to have a programmer's perspective on how human language works -- you'll find *Natural Language Processing with Python* both fascinating and immensely useful.

The Layers of the Text Sep 24 2020 This volume collects the most recent essays of Richard Hunter, one of the world's leading experts in the field of Greek and Latin literature. The essays range across all periods of ancient literature from Homer to late antiquity, with a particular focus not just on the texts in their original contexts, but also on how they were interpreted and exploited for both literary and more broadly cultural purposes later in antiquity. Taken together, the essays sketch a picture of a continuous tradition of critical and historical engagement with the literature of the past from the period of Aristophanes and then Plato and Aristotle in classical Athens to the rich prose literature of the Second Sophistic. Richard Hunter's earlier essays are collected in *On Coming After* (Berlin 2008).

Text as Data Mar 31 2021 A guide for using computational text analysis to learn about the social world From social media posts and text messages to digital government documents and archives, researchers are bombarded with a deluge of text reflecting the social world. This textual data gives unprecedented insights into fundamental questions in the social sciences, humanities, and industry. Meanwhile new machine learning tools are rapidly transforming the way science and business are conducted. *Text as Data* shows how to combine new sources of data, machine learning tools, and social science research design to develop and evaluate new insights. *Text as Data* is organized around the core tasks in research projects using text—representation, discovery, measurement, prediction, and causal inference. The authors offer a sequential, iterative, and inductive approach to research design. Each research task is presented complete with real-world applications, example methods, and a distinct style of task-focused research. Bridging many divides—computer science and social science, the qualitative and the quantitative, and industry and academia—*Text as Data* is an ideal resource

for anyone wanting to analyze large collections of text in an era when data is abundant and computation is cheap, but the enduring challenges of social science remain. Overview of how to use text as data Research design for a world of data deluge Examples from across the social sciences and industry

iGen Nov 07 2021 As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older

peers. Because where iGen goes, so goes our nation—and the world.

Literary Criticism Jul 23 2020 As the study of literature has extended to cultural contexts, critics have developed a language all their own. Yet, argues Mark Bauerlein, scholars of literature today are so unskilled in pertinent sociohistorical methods that they compensate by adopting clichés and catchphrases that serve as substitutes for information and logic. Thus by labeling a set of ideas an "ideology" they avoid specifying those ideas, or by saying that someone "essentializes" a concept they convey the air of decisive refutation. As long as a paper is generously sprinkled with the right words, clarification is deemed superfluous. Bauerlein contends that such usages only serve to signal political commitments, prove membership in subgroups, or appeal to editors and tenure committees, and that current textual practices are inadequate to the study of culture and politics they presume to undertake. His book discusses 23 commonly encountered terms—from "deconstruction" and "gender" to "problematize" and "rethink"—and offers a diagnosis of contemporary criticism through their analysis. He examines the motives behind their usage and the circumstances under which they arose and tells why they continue to flourish. A self-styled "handbook of counterdisciplinary usage," *Literary Criticism: An Autopsy* shows how the use of illogical, unsound, or inconsistent terms has brought about a breakdown in disciplinary focus. It is an insightful and entertaining work that challenges

scholars to reconsider their choice of words—and to eliminate many from critical inquiry altogether.

Teenage and Adult Texting Addictions Sep 05 2021 In this her new book Adetutu Ijose is seeking to shed light on another computer use induced health problem - Adult and Teenage texting addictions This is the art of compulsive desire for texting and thereby replacing most direct person to person forms of communication with texting a form of communication that takes place via an artificial medium requiring no physical contact either by voice or bodily. The artificial medium, the cell phone is really a computer though not marketed or described as such. Hence safety gained by not placing the device close to the shin is replaced by exposure to toxic artificial light and its potential for devastating health consequences over time including addiction and risky behaviors that accompany any form of addiction. This issue becomes even more worrying when the issue of sexting (the art of sending naked or near nude photographs by text) and cyber bullying are factored in. This book addresses the issue of texting addiction from all angles providing all with important information many are unaware of in order to provide an opportunity for all to bring back some control into their lives and avoid unnecessary self-destruction.

The 13 chapters cover early newspapers and pamphlets, present-day news stories and commentaries, TV talk shows and commercials as well as Internet presentations. The studies focus on the wide range of text types in 18th century newspapers and the interpersonal strategies of pamphlets. They pursue the sophisticated postmodernist and multilingual examples of today. Other topics are the definition and structure of news stories and

commentaries, the interpersonal and multi-

modal aspects of talkshows and the questioning of the journalist's role in the age of the Internet.
