The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

fast as you can, but the pile of unread essays grows taller and
taller. Guilt mounts. Students want to know when their papers
will come back. Grading begins consuming all your energy, your
weekends, your life. Grading papers is a fact of life, especially in
English classrooms, and the paper load is a leading cause of
teacher burnout. Fortunately, Carl Jago's here to help, and in

Papers, Papers, Papers, she offers you advice honed from thirty-one years in the English classroom and forty-five thousand papers worth of grading. You'll not only get through stacks of papers, but you'll do so accurately, completely, and with the time you need to give each and every student in your classes the attention they deserve. Ever practical and always professional, Jago suggests techniques that can be implemented right away to turn your mountain of essays into a foothill. She covers every aspect of attentive grading, including: responding to student drafts commenting rather than correcting using scoring guides and rubrics for common expectations fostering improvement from one paper to the next effective peer- and self-editing suggestions for alternatives to essays. With all this and her Ten Tips for Handling the Paper Load, Carol Jago gives you everything you need to keep on top of student papers.
