A comprehensive guide to Android forensics, from setting up the workstation to analyzing key artifacts Key FeaturesGet up and running with modern mobile forensic strategies and techniquesAnalyze the most popular Android applications using free and open source forensic toolsLearn malware detection and analysis techniques to investigate mobile cybersecurity incidentsBook Description Many forensic examiners rely on commercial, push-button tools to retrieve and analyze data, even though there is no tool that does either of these jobs perfectly. Learning Android Forensics will introduce you to the most up-to-date Android platform and its architecture, and provide a high-level overview of what Android forensics entails. You will understand how data is stored on Android devices and how to set up a digital forensic examination

environment. As you make your way through the chapters, you will work through various physical and logical techniques to extract data from devices in order to obtain forensic evidence. You will also learn how to recover deleted data and forensically analyze application data with the help of various open source and commercial tools. In the concluding chapters, you will explore malware analysis so that you'll be able to investigate cybersecurity incidents involving Android malware. By the end of this book, you will have a complete understanding of the Android forensic process, you will have explored open source and commercial forensic tools, and will have basic skills of Android malware identification and analysis. What you will learn

Understand Android OS and architecture
Set up a forensics environment for Android analysis
Perform logical and physical data extractions
Learn to recover deleted data
Explore how to analyze application data
Identify malware on Android devices
Analyze Android malware

Who this book is for
If you are a forensic analyst or an information security professional wanting to develop your knowledge of Android forensics, then this is the book for you. Some basic knowledge of the Android mobile platform is expected. This book includes key insights that reflect 'Advances in Computer and Computational Sciences' from upcoming researchers and leading academics around the globe. It gathers high-quality, peer-reviewed papers presented at the International Conference on Computer, Communication and Computational Sciences (IC4S 2018), which was held on 20-21 October, 2018 in Bangkok. The book covers a broad range of topics, including intelligent hardware and software design, advanced communications, intelligent computing techniques, intelligent image processing, and web and informatics. Its goal is to familiarize readers from the computer industry and academia with the latest advances in next-generation computer and communication technology, which they can subsequently integrate into real-world applications. Big data technologies are used to achieve any type of analytics in a fast and predictable way, thus enabling better human and machine level decision making. Principles of distributed computing are the keys to big data technologies and analytics. The mechanisms related to data storage, data access, data transfer, visualization and predictive modeling using distributed processing in multiple low cost machines are the key considerations that make big data analytics possible within stipulated cost and time practical for consumption by human and machines. However, the current literature available in big data analytics needs a holistic perspective to highlight the relation between big data analytics and distributed processing for ease of understanding and practitioner use. This book fills the literature gap by addressing key aspects of distributed processing in big data analytics. The chapters tackle the essential concepts and patterns of distributed computing widely used in big data analytics. This book discusses also covers the main technologies which support distributed processing. Finally, this book provides insight into applications of big data analytics, highlighting how principles of distributed computing are used in those situations. Practitioners and researchers alike will find this book a valuable tool for their work, helping them to select the appropriate technologies, while understanding the inherent strengths and drawbacks of those technologies. Natural

language processing (NLP) is a branch of artificial intelligence that has emerged as a prevalent method of practice for a sizeable amount of companies. NLP enables software to understand human language and process complex data that is generated within businesses. In a competitive market, leading organizations are showing an increased interest in implementing this technology to improve user experience and establish smarter decision-making methods. Research on the application of intelligent analytics is crucial for professionals and companies who wish to gain an edge on the opposition. The Handbook of Research on Natural Language Processing and Smart Service Systems is a collection of innovative research on the integration and development of intelligent software tools and their various applications within professional environments. While highlighting topics including discourse analysis, information retrieval, and advanced dialog systems, this book is ideally designed for developers, practitioners, researchers, managers, engineers, academicians, business professionals, scholars, policymakers, and students seeking current research on the improvement of competitive practices through the use of NLP and smart service systems. This proceedings book contains 37 papers selected from the submissions to the 6th International Conference on Computer Science, Applied Mathematics and Applications (ICCSAMA 2019), which was held on 19–20 December, 2019, in Hanoi, Vietnam. The book covers theoretical and algorithmic as well as practical issues connected with several domains of Applied Mathematics and Computer Science, especially Optimization and Data Science. The content is divided into four major sections: Nonconvex Optimization, DC Programming & DCA, and Applications; Data Mining and Data Processing; Machine Learning Methods and Applications; and Knowledge Information and Engineering Systems. Researchers and practitioners in related areas will find a wealth of inspiring ideas and useful tools & techniques for their own work. This book constitutes the proceedings of the 15th International Conference on Research Challenges in Information Sciences, RCIS 2021, which was planned to take place in Limassol, Cyprus, but had to change to an online event due to the COVID-19 pandemic. The conference took place virtually during May 11-14, 2021. It focused on the special theme "Information Science and Global Crisis". The scope of RCIS is summarized by the thematic areas of information systems and their engineering; user-oriented approaches; data and information management; business process management; domain-specific information systems engineering; data science; information infrastructures, and reflective research and practice. The 29 full papers and 6 work-in-progress papers presented in this volume were carefully reviewed and selected from 99 submissions. They were organized in topical sections named: Business and Industrial Processes, Information Security and Risk Management, Data and Information Management, Domain-specific Information Systems Engineering, User-Centered Approaches, Data Science and Decision Support, and Information Systems and Their Engineering. The volume also contains 13 poster and demo papers, and 4 doctoral consortium papers. In addition, two-page summaries of tutorials and research project papers can be found in the back matter. The book titled Advanced

Computational and Communication Paradigms: Proceedings of International Conference on ICACCP 2017, Volume 2 presents refereed high-quality papers of the First International Conference on Advanced Computational and Communication Paradigms (ICACCP 2017) organized by the Department of Computer Science and Engineering, Sikkim Manipal Institute of Technology, held from 8– 10 September 2017. ICACCP 2017 covers an advanced computational paradigms and communications technique which provides failsafe and robust solutions to the emerging problems faced by mankind. Technologists, scientists, industry professionals and research scholars from regional, national and international levels are invited to present their original unpublished work in this conference. There were about 550 technical paper submitted. Finally after peer review, 142 high-quality papers have been accepted and registered for oral presentation which held across 09 general sessions and 05 special sessions along with 04 keynote address and 06 invited talks. This volume comprises 77 accepted papers of ICACCP 2017. This book reports on cutting-edge research into innovative system interfaces, highlighting both lifecycle development and human–technology interaction, especially in virtual, augmented and mixed-reality systems. It describes advanced methodologies and tools for evaluating and improving interface usability and discusses new models, as well as case studies and good practices. The book addresses the human, hardware, and software factors in the process of developing interfaces for optimizing total system performance, while minimizing their costs. It also highlights the forces currently shaping the nature of computing and systems, such as: the importance of portability and technologies for reducing power requirements; the necessity of a better assimilation of computation in the environment; as well as solutions to promote accessibility to computers and systems for people with special needs. The book, which is based on the AHFE 2019 International Conference on Human Factors and Systems Interaction, held on July 24-28, 2019, in Washington D.C., USA, offers a timely survey and practice-oriented guide for systems interface users and developers alike. -My Samsung Galaxy S7 for Seniors helps you quickly get started with the new smartphone and use its features to look up information and perform day-to-day activities from anywhere, any time. Step-by-step instructions for the tasks you care about most Large, full-color, close-up photos show you exactly what to do Common-sense help whenever you run into problems. Tips and notes to help you do even more. Written for seniors by a senior, the full-color, step-by-step tasks--in legible print--walk you through getting and keeping your Samsung Galaxy S7 working just the way you want- -- This proceedings volume of InCoTEPD 2018 covers many ideas for handling a wide variety of challenging issues in the field of education. The outstanding ideas dealing with these issues result in innovation of the system. There are many innovation strategies resulting from recent research that are discussed in this book. These strategies will become the best starting points to solve current and future problems. This book provides an in-depth coverage of educational innovation developments with an emphasis on educational systems, formal or informal education strategies, learning models, and professional teachers. Indeed,

those developments are very important to be explored for obtaining the right way of problem-solving. Providing many ideas from the theoretical foundation into the practice, this book is versatile and well organized for an appropriate audience in the field of education. It is an extremely useful reference for students, teachers, professors, practitioners, and government representatives in many countries. The idea behind editing this book is to present a contemporary reference that tells the story of how businesses and institutions in emerging economies are circumventing or can better circumvent institutional voids in order to create distinct value for consumers and develop resilient and sustainable economies. For this book, we gathered 24 contributions (or chapters) on new directions and strategies to create value in emerging economies. The contributions span thematic areas such as: COVID-19 and small businesses, social influencers and COVID-19 advocacy, artisan entrepreneurship, leadership and project success, internationalization and intellectual property, cultural artifacts in corporate branding, fintech adoption, mobile money and agriculture value chain, workplace fraud, ethical decision-making in accountancy, modeling early detection of mother's mode of delivery, assessment of health systems in Africa, online platforms and patient empowerment, students' academic engagement and technology, and continuous use of e-learning among professional accounting students. The authors of these contributions discuss the relevance of each chapter to its target audience (practitioners and students). They also outline the implications for practice and policy (where applicable) alongside the concluding arguments of their respective chapters. In effect, the 24 chapters offer key strategic directions for businesses, public sector institutions, non-governmental organizations, and international development institutions to be more efficient and sustainably responsible in delivering distinctive value in emerging economies. Emerging economies have become an opportune interest of practitioners, entrepreneurs and policy makers worldwide. Hence, a contemporary text which explores how to create and deliver distinct value in these economies is a must a read.

New Pattern English Language for SBI/ IBPS Bank PO/ Clerk/ RRB Exams captures the changing pattern of the English section in the Banking Exams. The pattern has changed from simple & direct questions to Proficiency in English Language Comprehension. The recent papers have seen a change in the pattern of various questions - Parajumbles, Evaluating Inferences, Double Fillers, Comprehension passages, Sentence Synthesis, Contextual Phrase Usage, Connectors, Grammatical Errors, Vocabulary (Confusing Words). The book provides sufficient number of practice questions on each such type of questions. Further the book provides complete theory with fully solved exercises. The past questions of the various exams are also included in the book. The four-volume set LNCS 10513—10516 constitutes the proceedings of the 16th IFIP TC 13 International Conference on Human-Computer Interaction, INTERACT 2017, held in Mumbai, India, in September 2017. The total of 68 papers presented in these books was carefully reviewed and selected from 221 submissions. The contributions are organized in topical sections named: Part I: adaptive design and mobile applications; aging and disabilities; assistive technology for blind users;

audience engagement; co-design studies; cultural differences and communication technology; design rationale and camera-control. Part II: digital inclusion; games; human perception, cognition and behavior; information on demand, on the move, and gesture interaction; interaction at the workplace; interaction with children. Part III: mediated communication in health; methods and tools for user interface evaluation; multi-touch interaction; new interaction techniques; personalization and visualization; persuasive technology and rehabilitation; and pointing and target selection. The natural disasters are the killer agents which can/can't be predicted even though we have modern technology. Every year, in one place or another, disasters striking which is devastating the area and surroundings, leading to ecological disruption besides huge loss of life and property. India is vulnerable to cyclones, landslides/avalanches, earthquakes, floods, droughts, forest fires, epidemics, etc. The 5700-km long coast of India, with its dense population is vulnerable to cyclones/low depressions, tsunamis, etc. The 2400-km long rugged Himalayan terrain is vulnerable to landslides, avalanches and earthquakes. India is not only vulnerable to natural disasters, it is also experiencing industrial accidents. The Bhopal Gas tragedy is one of the major man-made disasters in the world. The state of Andhra Pradesh has 970-km long coastline with two major rivers, etc. The conference is conducted in Visakhapatnam, is famous for industries and tourism. Recently, several industrial accidents took place, besides major natural disasters like Hud-Hud, etc. Disaster management shall be implemented from the grass root level in vulnerable areas to improve the capacity building, so as to minimize the losses. The capacity building coupled with technology results in reduction of loss of life and property. This book focuses on software sustainability, regarded in terms of how software is or can be developed while taking into consideration environmental, social, and economic dimensions. The sixteen chapters cover various related issues ranging from technical aspects like energy-efficient programming techniques, formal proposals related to energy efficiency measurement, patterns to build energy-efficient software, the role of developers on energy efficient software systems and tools for detecting and refactoring code smells/energy bugs; to human aspects like its impact on software sustainability or the adaptation of ACM/IEEE guidelines for student and professional education and; and an economics-driven architectural evaluation for sustainability. Also aspects as the elements of governance and management that organizations should consider when implementing, assessing and improving Green IT or the relationship between software sustainability and the Corporate Social Responsibility of software companies are included. The chapters are complemented by usage scenarios and experience reports on several domains as cloud applications, agile development or e-Health, among others. As a whole, the chapters provide a complete overview of the various issues related to sustainable software development. The target readership for this book includes CxOs, (e.g. Chief Information Officers, Chief Executive Officers, Chief Technology Officers, etc.) software developers, software managers, auditors, business owners, and quality professionals. It is also intended for students of software engineering and information systems, and software researchers who want to know the

state of the art regarding software sustainability. The book includes high-quality papers presented at the Second National Conference of Information, Photonics and Communication (2019), organized by the Department of Electronics & Communication Engineering, B.P. Poddar Institute of Management & Technology from 01 to 03 February 2019. Covering multiple domains in four broad categories—photonics; devices and VLSI; communication systems and networks; signal processing and intelligent systems, it includes topics such as RF and microwave communications, wireless and mobile communication, satellite communications, signal, image and video processing, deep learning and optical networks. Smartphone usage has created a new means for detection, analysis, diagnosis and monitoring through the use of new apps and attachments. These breakthrough analytical methods offer ways to overcome the drawbacks of more conventional methods, such as the expensive instrumentation that is often needed, complex sample pre-treatment steps, or time-consuming procedures. Smartphone-Based Detection Devices: Emerging Trends in Analytical Techniques gathers these modern developments in smartphone analytical methods into one comprehensive source, covering recent advancements in analytical tools while paying special attention to the most accurate, highly efficient approaches. Serving as a guide not only to analytical chemists but also to environmentalists, biotechnologists, pharmacists, forensic scientists and toxicologists, Smartphone-Based Detection Devices: Emerging Trends in Analytical Techniques is an important source for researchers who require accurate analysis of their on- and off-site samples. Students in these fields at the graduate and post-graduate level will also benefit from this topical and comprehensive book. Provides an integrated approach for advanced analytical methods and techniques using smartphones Covers the usage of smartphones in sample prep, integration and detection stages of analytical chemistry Applicable for researchers of all levels, from graduate students to professionals The volume of data that is generated, stored, and communicated across different industrial sections, business units, and scientific research communities has been rapidly expanding. The recent developments in cellular telecommunications and distributed/parallel computation technology have enabled real-time collection and processing of the generated data across different sections. On the one hand, the internet of things (IoT) enabled by cellular telecommunication industry connects various types of sensors that can collect heterogeneous data. On the other hand, the recent advances in computational capabilities such as parallel processing in graphical processing units (GPUs) and distributed processing over cloud computing clusters enabled the processing of a vast amount of data. There has been a vital need to discover important patterns and infer trends from a large volume of data (so-called Big Data) to empower data-driven decision-making processes. Tools and techniques have been developed in machine learning to draw insightful conclusions from available data in a structured and automated fashion. Machine learning algorithms are based on concepts and tools developed in several fields including statistics, artificial intelligence, information theory, cognitive science, and control theory. The recent advances in machine learning have

had a broad range of applications in different scientific disciplines. This book covers recent advances of machine learning techniques in a broad range of applications in smart cities, automated industry, and emerging businesses. Android is the mobile operating system that is used on the majority of smartphones worldwide. It is a robust and versatile operating system that can be used by any manufacturer to add to their handsets. This means that there is a wide range of Android phones available and also different versions of Android that run on them. Android Phones for Seniors in easy steps, 2nd edition starts with a detailed look at the different versions of Android, and the range of models of phones that are available. It also explains the relationship with Google and the services that can be used with an Android phone. The book looks at using the interface of an Android phone including:

- Using Home screens
- Organizing apps
- Viewing notifications
- Locking the phone
- Searching for items
- Accessing the range of Android settings
- Syncing with other Android Devices

The book also covers all aspects of the standard communication functions that are now commonplace on smartphones:

- Making and receiving calls
- Making video calls
- Sending text messages
- Adding contacts
- Sending emails
- Browsing the web

Android phones are excellent for a range of mobile entertainment, and the book shows how to listen to music, watch videos and read books. It also deals with taking and viewing photos so that you can use your Android phone as a replacement for a digital camera. Due to the range of versions of Android and models of phones, Android phones can sometimes appear a bit of a maze. However, Android Phones for Seniors in easy steps, 2nd edition provides a clear guide to navigate through the issues and ensure that you can get the most out of your Android phone, whichever version it is. Updated for Android v7 Nougat.

Table of Contents: 1. Introducing Android Phones 2. Models of Android Phones 3. Android Settings 4. Around an Android Phone 5. Calls and Contacts 6. Using the Keyboard 7. Messaging and Email 8. Android Apps 9. Being Entertained 10. Keeping in the Picture 11. Online with Chrome 12. Staying Secure

- Target SBI Bank PO Exam 20 Practice Sets Workbook (English Edition) is the 7th edition written exclusively for the New pattern Exam being conducted by SBI for recruitment in PO in the SBI.
- The book provides 20 Practice Sets – 5 Preliminary Exam Tests + 15 Main Exam Tests (10 in the book and 5 as Online Tests) & 10 Descriptive Tests with explanations - designed exactly on the new pattern of the latest SBI Bank PO Exam.
- The Preliminary Test contains all the 3 sections - Reasoning Ability, Numerical Ability and English Language - as per the latest pattern.
- The Mains Test contains all the 4 variety of tests - Reasoning and Computer Knowledge, Data Analysis & Interpretation, General/ Banking/ Economy Awareness and English Language - as per the latest pattern.
- The Descriptive Tests contains Essay Writing, Letter Writing and Paragraph Writing as per the latest pattern suggested by SBI.
- The solution to each type of Test is provided.
- The General Awareness section in the Main Test of each Practice Set contains questions from General Awareness, Current Affairs, Banking and Economic Awareness
- The book also provides past solved papers of 2015-17 Prelim & Main SBI PO Exam.
- This book will really help the students in developing the required Speed and Strike

Rate, which will increase their final score in the exam. The thoroughly Revised & Updated 8th edition of the book "Comprehensive Guide to SBI Bank PO Exam" is based on the new pattern - Preliminary and Main. The book covers all the 3 sections asked in the Preliminary Exam and the 4 sections asked in the Main exam - English Language, Data Analysis & Interpretation, Reasoning & Computers and General/Banking/Economy Awareness. The USP of this new edition is the inclusion of new Questions based on the 2017-18 format of Banking exams. New Variety of High Level Questions have been included are Data Analysis/ Interpretation, Problem Solving, Direction, Input-Output, Coding-Decoding, RC, Filler, Sentence Rearrangement (column based) etc. # The theory of the book has been updated as per the various questions asked in the past examination as conducted by the SBI. # The book provides well illustrated theory with exhaustive fully solved examples for learning. This is followed with an exhaustive collection of solved questions in the form of Exercise. # The book provides separate sections for General Awareness including Banking Knowledge, Computer Knowledge and Marketing Aptitude. # The book incorporates fully solved 2011 - 2019 papers. The six-volume set comprising the LNCS volumes 11129-11134 constitutes the refereed proceedings of the workshops that took place in conjunction with the 15th European Conference on Computer Vision, ECCV 2018, held in Munich, Germany, in September 2018. 43 workshops from 74 workshops proposals were selected for inclusion in the proceedings. The workshop topics present a good orchestration of new trends and traditional issues, built bridges into neighboring fields, and discuss fundamental technologies and novel applications. It is impossible to imagine the modern world without sensors, or without real-time information about almost everything—from local temperature to material composition and health parameters. We sense, measure, and process data and act accordingly all the time. In fact, real-time monitoring and information is key to a successful business, an assistant in life-saving decisions that healthcare professionals make, and a tool in research that could revolutionize the future. To ensure that sensors address the rapidly developing needs of various areas of our lives and activities, scientists, researchers, manufacturers, and end-users have established an efficient dialogue so that the newest technological achievements in all aspects of real-time sensing can be implemented for the benefit of the wider community. This book documents some of the results of such a dialogue and reports on advances in sensors and sensor systems for existing and emerging real-time monitoring applications. Current affairs 2023 for States PSC, UPPSC, Railway, TNPSC, RPSC, RRB, IBPS, CLAT, SSC, Banking, MPSC, BPSC, and for Government Jobs. This book is primarily designed for students preparing for various competitive examinations. It will also be helpful for those preparing for midterm exams in schools or universities. The aim of this book is twofold: first, to help the students preparing for competitive examinations, seeking admission to universities or schools, or prepare for job interviews. Second, it will also be helpful for those studying CURRENT AFFAIRS-2022. This book contains more than 6889 questions from the core areas of CURRENT AFFAIRS-2022. The questions are grouped chapter-

wise. There are total 2 chapters, 0 sections and 6889+ MCQ with answers. This reference book provides a single source for multiple choice questions and answers in CURRENT AFFAIRS-2022. It is intended for students as well as for developers and researchers in the field. This book is highly useful for faculties and students. One can use this book as a study guide, knowledge test questions bank, practice test kit, quiz book, trivia questions . . . etc. The strategy used in this book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other nutritious drink). The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those

noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!. Have you ever wanted to travel? How about traveling solo? How about traveling solo as a female? Do you wish for continuous travels? Or, even to live somewhere else for a while? This guide is for all you, who are:

- Aspiring female solo travelers
- Lusting to live out your wanderlust dreams
- Willing to give up your comforts for the unfamiliar

Once you've made traveling a priority and want to make your dreams a reality, go ahead and pick up this quick guide! Or, maybe you have a friend who could use this. Now, that you've decided to travel, what are the next steps? Have you thought about where you want to start? What about how to budget for your travels? Or, what about your birth control? In this guide, I'll cover everything you need to know! It will help you manage details from trip preparation to your return home. I'll even discuss concerns you might forget during your initial excitement. Topics include:

- Mapping your travels
- Budgeting for your trip
- Sexual harassment
- Visas
- Vaccinations
- Health Insurance
- Cellphones
- Travel Apps
- Homesickness
- Culture shock
- Volunteering
- Finding work

After reading the guide, you'll feel more confident to globe trot to whatever country you want. And, even more importantly, you'll be ready to face any challenge that comes your way. About the Expert Rebecca Friedberg

graduated from The Ohio State University in 2017 where she pursued a degree in Classical Languages and a minor in Business Administration. After graduating, she traveled the world solo for six months. Her travels took her to Spain, France, Germany, and Romania in Europe. In Asia, she traveled to Nepal, Thailand, Cambodia, and Vietnam. Rebecca decided to travel after her first year in university. She knew that traveling held endless and valuable life-lessons she couldn't learn at school. While in school, she saved her money, committed to the idea of traveling the world, and then made it a reality for herself. She wrote this guide to pass along advice she was given and help future female solo world travelers. This is Rebecca's second guide with HowExperts. For her first one, her topic was how to trek through the Manaslu Mountains of Nepal. In the future, Rebecca hopes to write other works and travel. HowExpert publishes quick 'how to' guides on all topics from A to Z by everyday

experts. Step-by-step instructions with callouts to Samsung Galaxy S 4 photos that show you exactly what to do. Help when you run into Samsung Galaxy S 4 problems or limitations. Tips and Notes to help you get the most from your Samsung Galaxy S 4. Full-color, step-by-step tasks walk you through getting and keeping your Samsung Galaxy S 4 working just the way you want. The two-volume set LNAI 13073 and 13074 constitutes the proceedings of the 10th Brazilian Conference on Intelligent Systems, BRACIS 2021, held in São Paulo, Brazil, in November-December 2021. The total of 77 papers presented in these two volumes was carefully reviewed and selected from 192 submissions. The contributions are organized in the following topical sections: Part I: Agent and Multi-Agent Systems, Planning and Reinforcement Learning; Evolutionary Computation, Metaheuristics, Constraints and Search, Combinatorial and Numerical Optimization, Knowledge Representation, Logic and Fuzzy Systems; Machine Learning and Data Mining. Part II: Multidisciplinary Artificial and Computational Intelligence and Applications; Neural Networks, Deep Learning and Computer Vision; Text Mining and Natural Language Processing. Due to the COVID-2019 pandemic, BRACIS 2021 was held as a virtual event. Why does the World Health Organization (WHO) put emphasis on neglected tropical diseases (NTDs)? What are the NTDs? Are NTDs found in the United States? Is there any relationship between coronavirus disease 2019 (COVID-19) and NTDs? These are some of the questions being addressed in the book. The aim of this textbook is to introduce a modern synthesis on human parasites of medical importance. Species of parasitic protozoa and helminths are presented in detail, from history and discovery to aspects of genomes and molecular biology, together with life cycle, therapy, drug resistance, and case studies of parasitic diseases useful to the clinicians. This book is primarily designed for students preparing for various competitive examinations. It will also be helpful for those preparing for midterm exams in schools or universities. The aim of this book is twofold: first, to help the students preparing for competitive examinations, seeking admission to universities or schools, or prepare for job interviews. Second, it will also be helpful for those studying CURRENT AFFAIRS-GK. This book contains more than 2675 questions from the core areas of CURRENT

The two volume set LNCS 11678 and 11679 constitutes the refereed proceedings of the 18th International Conference on Computer Analysis of Images and Patterns, CAIP 2019, held in Salerno, Italy, in September 2019. The 106 papers presented were carefully reviewed and selected from 176 submissions The papers are organized in the following topical sections: Intelligent Systems; Real-time and GPU Processing; Image Segmentation; Image and Texture Analysis; Machine Learning for Image and Pattern Analysis; Data Sets and Benchmarks; Structural and Computational Pattern Recognition; Posters. This volume constitutes the refereed proceedings of the 13th International Conference on Intelligent Human Computer Interaction, IHCI 2021, which took place in Kent, OH, USA, in December 2021. The 59 full and 9 short papers included in these proceedings were carefully reviewed and selected from a total of 142 submissions. The papers were organized in topical sections named human centered AI; and intelligent interaction and cognitive computing This book reports on the state of the art in physical ergonomics and addresses the design of products, processes, services, and work systems to ensure they are productive, safe, and enjoyable for people to use. The human body's responses to physical and physiological work demands, strain injuries from repetition, vibration, force, and posture are the most common types of issues examined, along with their design implications. The book explores a wide range of topics in physical ergonomics, including the consequences of repetitive motion, materials handling, workplace safety, the usability of portable devices, design, working postures, and the work environment. Mastering physical ergonomics and safety engineering concepts is fundamental to creating products and systems that people can safely and conveniently use, as well as avoiding stresses and minimizing the risk of accidents. Based on the AHFE 2018 Conference on Physical Ergonomics and Human Factors, held on July 21–25, 2018, in Orlando, Florida, USA, this book provides readers with a comprehensive perspective on the current challenges in physical ergonomics, which is a critical aspect in the design of any human-centered technological system,

and for factors influencing human performance. Technological advancements are often regarded as positive, as they are usually expected to make life and business easier. While this can often be the case, it is not always true, and much of the improvement in the realm of technology comes from analysis of new technologies for effectiveness. Technology Management in Organizational and Societal Contexts is a critical scholarly publication that explores the relationship between businesses and institutions and technology and analyzes the outcomes in order to promote improvement. Featuring coverage on a wide range of topics, such as e-services, multimedia in education, and issues of emerging technologies, this publication is geared towards academicians, researchers, and students seeking relevant and current research on the interactions between organizations and technology. The recent advancements in the machine learning paradigm have various applications, specifically in the field of medical data analysis. Research has proven the high accuracy of deep learning algorithms, and they have become a standard choice for analyzing medical data, especially medical images, video, and electronic health records. Deep learning methods applied to electronic health records are contributing to understanding the evolution of chronic diseases and predicting the risk of developing those diseases. Approaches and Applications of Deep Learning in Virtual Medical Care considers the applications of deep learning in virtual medical care and delves into complex deep learning algorithms, calibrates models, and improves the predictions of the trained model on medical imaging. Covering topics such as big data and medical sensors, this critical reference source is ideal for researchers, academicians, practitioners, industry professionals, hospital workers, scholars, instructors, and students.
