As seen in the New York Times -- a practical guide that presents an alternative to shouting, shaming, and blaming--to give kids the skills they need to grow and thrive Discipline is an essential part of raising happy and successful kids, but as more and more parents are discovering, conventional approaches often don't work, and can even lead to more frustration, resentment, power struggles, and shame. Enter Sarah Ockwell-Smith, a popular parenting expert who believes there's a better way. Citing the latest research in child development, psychology and neuroscience, Gentle Discipline debunks common myths about punishments, rewards, the "naughty chair," and more, and presents practical, connection-based techniques that really work--and that bring parents and kids closer together instead of driving them apart. Decades of research have demonstrated that the parent-child dyad and the environment of the family--"which includes all primary caregivers"--are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents

themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States. In this easy-to-read, science-based book, parents, caregivers, and adults of all kinds discover how discipline affects children's development, why intervention should reinforce connection not separation, and why the disciplinary strategies that may have been used on us as children are not the ones that children really need. As a practicing child and family psychologist and advisor to the British Columbia ministry of children and families, Dr. Vanessa has seen it all, and she has navigated hundreds of tough situations with families. Drawing on scientific research and a wealth of clinical experience, she shows you how to put out the fire without dampening your child's spirits; how to correct their behavior while emphasizing connection; and how to discipline without damage. Janet Lansbury is unique among parenting experts. As a RIE teacher and student of pioneering child specialist Magda Gerber, her advice is not based solely on formal studies and the research of others, but also on her twenty years of hands-on experience guiding hundreds of parents and their toddlers. "No Bad Kids" is a collection of Janet's most popular and widely read articles pertaining to common toddler behaviors and how respectful parenting practices can be applied to benefit both parents and children. It covers such common topics as punishment, cooperation, boundaries, testing, tantrums, hitting, and more. "No Bad Kids" provides a practical, indispensable tool for parents who are anticipating or experiencing those critical years when toddlers are developmentally obliged to test the limits of our patience and love. Armed with knowledge and a clearer sense of the world through our children's eyes, this period of uncertainty can afford a myriad of opportunities to forge unbreakable bonds of trust and respect. This book provides a doable framework what decodes the mysteries of disciplining your kids with grace and will help restore hope, freedom, and peace in your home. Grace Based Discipline will help you: -Customize your discipline strategy to your unique kids-Determine what your rules should be-Base your family's values and expectations on God's Word-Discern what types of violations are most serious, which battles to fight, and how to respond to unwanted behavior-Become an expert in choosing and applying effective consequences Teaching your toddler that "no means no" now can save you both suffering. But how do you say it so that he'll understand? For many parents of toddlers, saying "no" over and over becomes a mantra for exhaustion. Why is it so difficult to convey the meaning of this tiny word? Because, says pediatrician Will Wilkoff, when it comes to tots, actions speak louder than words. Using very direct and simple guidelines, Dr. Wilkoff shows you how to develop a consistent and effective discipline plan. He explains what can go wrong with time-out and how to overcome obstacles, including your child's rebelliousness, physical space issues, and your own reluctance. He also presents helpful advice for special situations, such as how to say no at meal times, at grandma's house, and when your child is sick. Presenting his compassionate and practical approach, Dr. Wilkoff shows how you can respond to the misbehavior of very young children while teaching them self-control that will benefit them throughout their lives. How to Say No to Your Toddler is the ideal guide for any parent who wants to take a more effective approach for raising healthy, happy children. The burgeoning social scientific study of tourism has emphasized the effects of the post-industrial economy on travel and place. However, this volume takes some of these issues into a different area of leisure: the spare-time carved out by people as part of their everyday lives - time that is much more intimately juxtaposed with the pressures and influences of work life, and which often involves specific bodily practices associated with hobbies and sports. An important focus of the book is the body as a site of identity formation, experience, and disciplined recreation of the self. Contributors examine the ways rituals, sports, and forms of bodily transformation mediate between contemporary ideologies of freedom, choice and self-control. The results of a survey on school violence, which was conducted with a national sample of 1,234 public elementary, middle, & secondary schools in all states in 1997. Education of America's school children always has been and always will be a hot-button issue. From what should be taught to how to pay for education to how to keep kids safe in schools, impassioned debates emerge and mushroom, both within the scholarly community and among the general public. This volume in the point/counterpoint Debating Issues in American Education reference series tackles the topic of school discipline and safety. Fifteen to twenty chapters explore such varied issues as child abuse reporting, corporal punishment, student uniforms, zero tolerance policies, and more. Each chapter opens with an introductory essay by the volume editor, followed by point/counterpoint articles written and signed by invited experts, and concludes with Further Readings and Resources, thus providing readers with views on multiple sides of school discipline and safety issues and pointing them toward more in-depth resources for further exploration. The Politics of Market Discipline in Latin America uses a multi-method approach to challenge the conventional wisdom that financial markets impose broad and severe constraints over leftist economic policies in emerging market countries. It shows, rather, that in Latin America, this influence varies markedly among countries and over time, depending on cycles of currency booms and crises exogenous to policy making. Market discipline is strongest during periods of dollar scarcity, which, in low-savings commodity-exporting countries, occurs when commodity prices are high and international interest rates low. In periods of dollar abundance, when the opposite happens, the market's capacity to constrain leftist governments is very limited. Ultimately, Daniela Campello argues that financial integration should force the Left toward the center in economies less subject to these cycles, but not in those most vulnerable to them. Political party leaders in the U.S. House of Representatives command greater loyalty than ever from fellow party members in roll call votes, campaign contributions, and partisan speeches. In return, leaders reward compliant members with opportunities to promote constituent interests and to advance their own political careers. Denial of such privileges as retribution against those who don't fully support the party agenda may significantly damage a member's prospects. Kathryn Pearson examines the disciplinary measures that party leaders in the U.S. House of Representatives employ to exact such loyalty, as well as the consequences for a democratic legislature. Drawing upon data from 1987-2010, Pearson identifies the conditions under which party leaders opt to prioritize policy control and those which induce them to prioritize majority control. She then assesses the ways in which these choices affect, on one hand, the party's ability to achieve its goals, and on the other hand, rank-and-file members' ability to represent their constituents. Astute party leaders recognize the need for balance, as voters could oust representatives who repeatedly support the party's agenda over their constituents' concerns, thereby jeopardizing the number of seats their party holds. In her conclusion, Pearson discusses the consequences of party discipline such as legislative gridlock, stalled bills, and proposals banned from the agenda. Although party discipline is likely to remain strong as citizens become more cognizant of enforced party loyalty, their increasing dissatisfaction with Congress may spur change. This book introduces the concept of "reflective discipline" as an approach to address the problem of racial disparity. A sweeping account of neoliberal governmental restructuring across the world, 'The Logic of Discipline' offers a powerful analysis of how this undemocratic model is unraveling in the face of a monumental-and ongoing-failure of the market. In The Time's Discipline. Philip Berrigan and Elizabeth McAlister offer us a chronicle of their community in Baltimore. They show us that for their nonviolent community, resistance to the nuclear arms race is not merely a political endeavor, but most profoundly a spiritual endeavor, rooted in fidelity to the Gospel. Thus the reporting of Jonah House's first fifteen years is formed around the Beatitudes, eight points of blessing at the outset of Matthew's presentation of the Sermon on the Mount. Invariably for Phil & Liz and those who have been part of their work at Jonah house and related endeavors, that spirituality is not abstract, but rooted in community and resistance and thus very much of this world and in service to its highest good. Understanding that we live in a nuclear empire, they present us in these pages, their experiment in truth in its midst. Based originally on the work of the Austrian psychiatrist, Alfred Adler, work which was further developed by Rudolph Dreikurs, this book Dreikurs, this book offers solutions to specific child discipline problems. Part I focuses on effective discipline in the home. These topics are covered: fundamentals of practical parenting; problems of routine living; problems of order and cooperation; interaction problems; special problems; building a cooperative family; and helping other families. Within these topics specific areas such as getting up, eating, keeping clean, chores, fighting in the car, dawdling, temper tantrums, and bad habits are discussed. Part II focuses on effective discipline in the school. These topics are covered: the teacher's dilemma; autocratic and

democratic classroom atmospheres; building a democratic group; encouragement; goals of children's behaviors; learning through natural and logical consequences; centering; and Corsini 4-R schools. Within these topics specific areas such as moving toward democratic discipline; guidelines and ground rules for classroom discussion; class council; how to encourage; encouragement versus praise; how to correct mistaken goals; and new classroom dimensions are discussed. A general bibliography, as well as bibliographies on the topics of children's stories, guided imagery and mediation, relaxation, and energizers, are included. (ABL) This work, along with the other volumes in the Foundational Knowledge of the Bible series, can help those who are young in the faith to seek a Christian relationship with God. All who choose to enter into the new covenant must concurrently embrace a new perceptual field. By heeding God's call to service, believers embark upon a Christian journey to become wise from the application of spiritual knowledge. This is made possible with the indwelling of the Holy Spirit who guides covenant believers in the faithful word of God, which is the source of all spiritual truth in this world. The intended purpose presented in this plan of action is to speak the truth of God in love so that the brethren can learn godly discernment, be equipped with sound doctrine, and grow together in all things according to Christ's authoritative leadership (Eph. 4:15). By becoming covenant Christians set apart by God for his particular use, we can be diligent by precisely and accurately handling the word of truth (2 Tim. 2:15). This series can serve to edify and ground those who are new in the faith because the revelation of God provides all the essential answers to life's pressing spiritual questions, whether general or specific. Accordingly, Christ's disciples need to comprehend the questions before the answers can have real meaning. No greater reason can be given for studying the Bible. Therefore, the people of God are duty-bound to master this Christian discipline. The first volume in this series is divided into three phases of Bible study: "Why" addresses the importance of knowing God's word, study motivations, conditions for discipleship, Christian distinctions, and the attributes needed to study biblical truth. "How" covers preliminary actions, Bible versions, principles, study considerations, and necessary skills. "What" offers a unique sevenfold framework for understanding the Bible. Divine power can move the Scriptures to be more than words on a page. It can become a life-changing force for good in the world. To that end, this resource directs the reader on how to inquire, search, and ask diligently concerning godly truth. Invaluable information, accessible resources, clear educational materials, and deep biblical insights will all quickly serve to establish beginning students in the Sacred Text. This work will also prepare the reader to receive the Scriptures by learning how to obtain a faithful accounting of spiritual truth. To be sure, wisdom is the result of applying biblical knowledge to our lives. By speaking divine truth in love, believers can grow together in Christ as fellow workers who labor in the word of God. There is no greater work in this world than to share this life-saving truth with others. The obligation of receiving divine knowledge requires that it be shared. Truly, giving the hope and joy that is found in Jesus Christ, and the message he brought from the Father, is the greatest privilege of a human life. Amen, and amen. CONCERN: A Pamphlet Series for Questions of Christian Renewal was born in the 1950s of shared concerns over a gap between an Anabaptist vision and contemporary, North American Mennonite reality. The initial group views the increasingly hierarchical denominational structure, the emergence of centralized, professionalized, pastoral ministry, and the resultant changes in polity and practice as fundamentally incompatible with a Believers' Church ecclesiology. Essays here present that critique and discussion of the reconfiguration of pastoral and communal authority, as well as the assertion that reclamation of a disciplined priesthood of all believers is the path of Christian renewal. Today the question of what institutional forms best structure the leadership, authority, and shared life of congregations persists, marked by particular concern to attend to the exercise of power within actual communities of faith.
