Rethinking the History of Italian Fascism Jan 18

2023 In the last years, the discussion around what is fascism, if this concept can be applied to present forms of politics and if its seeds are still present today, became central in the political debate. This discussion led to a vast reconsideration of the meaning and the experience of fascism in Europe and is changing the ways in which scholars of different generations look at this political ideology and come back to it and it is also changing the ways in which we consider the experience of Italian fascism in the European and global context. The aim of the book is building a general history of Fascism and its historiography through the analysis of 13 different fundamental aspects, which were at the core of Fascist project or of Fascist practices during the regime. Each essay considers a specific and meaningful aspect of the history of Italian fascism, reflecting on it from the vantage point of a case study. The essays thus reinterrogates the history of Fascism to understand in which way Fascism was able to mould the historical context in which it was born, how and if it transformed political, cultural, social

elements that were already present in Italy. The themes considered are violence, empire, war, politics, economy, religion, culture, but also antifascism and the impact of Fascism abroad, especially in the Twenties and at the beginnings of the Thirties. The book could be both used for a general public interested in the history of Europe in the interwar period and for an academic and scholarly public, since the essays aim to develop a provocative reflection on their own area of research.

This book gathers, and makes available in English, with new introductions, previously out of print or otherwise difficult to access

articles by Fr Roberto Busa S.J. (1913 - 2011). Also included is a comprehensive bibliography of Busa, an oral history interview with Busa's translator, and a substantial new chapter that evaluates Busa's contributions and intellectual legacies. The result is a groundbreaking book that is of interest to digital humanists and computational linguists as well as historians of science, technology and the humanities. As the application of computing to cultural heritage becomes ever more ubiquitous, new possibilities for transmitting, shaping, understanding, questioning and even imagining the human record are opening up. Busa is considered by many to be among the pioneers in this field, and his research on projects like the Index Thomisticus is one of the earliest known examples of a humanities project that incorporated automation; it continues to be widely cited and used today. Busa published more than 350 academic articles and shorter pieces in numerous languages, but despite the unquestionable importance of his early work for understanding the history and development of fields like humanities computing and computational linguistics, a large part of his canon and thinking remained inaccessible or difficult to access until this book.

2022 This book offers a critical edition of the petitions in their original Italian language that

(Catholic) Jews residing in Italy submitted to the Fascist General Administration for Demography and Race (Demorazza) in order either to be "discriminated," i.e., not subjected to various provisions of Mussolini's racial laws.

The Primacy of the Bishop of Rome and the Ecumenical Dialogue Nov 16 2022 The mixed results of the ecumenical dialogue since the Second Vatican Council have made it clear that the primacy of the Bishop of Rome remains the single most serious obstacle on the path of ecumenism. In his landmark 1995 encyclical *Ut unum sint*, Pope John Paul II reiterated the constant teaching that the Catholic Church "has preserved the ministry of the Successor of the Apostle Peter, the Bishop of Rome." He also invited leaders and theologians of other Christian communities to engage in a "patient and fraternal dialogue on this subject...to find a way of exercising the primacy which, while in no way renouncing what is essential to its mission, is nonetheless open to a new situation." This book explores in depth the discussion of papal primacy in the Catholic-Orthodox, Catholic-Lutheran and Catholic Anglican dialogues, along with an appendix on the concept of "Sister Churches." Each chapter describes how the primacy is viewed in the respective churches or ecclesial communities, then it analyzes the documents of the official ecumenical dialogue and realistically evaluates the results achieved thus far.

The Oxford Handbook of Political Ideologies \_\_\_\_\_ Feb

07 2022 This is the first comprehensive volume to offer a state of the art investigation both of the nature of political ideologies and of their main manifestations. The diversity of ideology studies is represented by a mixture of the range of theories that illuminate the field, combined with an appreciation of the changing complexity of concrete ideologies and the emergence of new ones. Ideologies, however, are always with us. The Handbook is divided into three sections: The first is divided into three sections: The first reflects some of the latest thinking about the development of ideology on an historical dimension, from the standpoints of conceptual history, Marx studies, social science theory and history, and leading schools of continental philosophy. The second includes some of the most recent interpretations and theories of ideology, all of which are sympathetic in their own ways to its exploration and close investigation, even when judiciously critical of its social impact. This section contains many of the more salient contemporary accounts of ideology. The third focuses on the leading ideological families and traditions, as well as on some of their cultural and geographical manifestations, incorporating

both historical and contemporary perspectives. Each chapter is written by an expert in their field, bringing the latest approaches and understandings to their task. The Handbook will position the study of ideologies in the mainstream of political theory and political analysis and will attest to its indispensability both to courses on political theory and to scholars who wish to take their understanding of ideologies in new directions.

Vita Di Torquato Tasso Dec 25 2020

Between La Salette and Lourdes Feb 19 2023 In September 1855, Teresa Dus, a Slovenian-speaking ten-year-old girl, saw the Virgin Mary in Porzûs. The apparitions began a devotion among the Slovenian population on the border between the

Italian and Slovenian ethnicities and cultures. The ecclesiastical authorities of Udine took the child, locked her in a religious house and extinguished the devotion. The context was marked by a cholera epidemic and by the "national" and pan-Slavist problem, exacerbated by the Crimean war (1853–1856). Devotion to the Virgin had had an international flowering "from below" (La Salette, 1846), followed by the proclamation of the dogma of the Immaculate Conception (1854). The dogma was then "sanctioned" by the apparitions of Lourdes (1858). The Porzûs affair is investigated in this international context.

The First World War May 10 2022 This volume is the result of an international conference held at Sapienza University of Rome in June 2014, which brought together scholars from different countries to re-analyse and re-interpret the events of the First World War, one hundred years after a young Bosnian Serb student from the "Mlada Bosna," Gavrilo Princip, "lit the fuse" and ignited the conflict which was to forever change the world. The Great War – initially on a European and then on a world scale – demonstrated the fragility of the international system of the European balance of powers, and determined the dissolution of the great multinational empires and the need to redraw the map of Europe according to the principles of national sovereignty. This book provides new insights into

theories of this conflict, and is characterized by internationality, interdisciplinarity and a combination of different research methods. The contributions, based on archival documents from various different countries, international and local historiography, and on the analysis of newspaper articles, postcards, propaganda material, memorials and school books, examine ideological and historiographical debates, the memory of the war and its most important contemporary and popular narratives, and the use of propaganda for the mobilization of public opinion, in addition to military, social, political, economic and psychological aspects of the conflict.

Apr 28 2021 The opening of the archives of the Roman Inquisition and of the Index of Prohibited Books, in January 1998, enables us to think afresh about the history of two organisations more notorious than understood. Both have been considered, almost exclusively, from the perspective of their victims, such as Galileo Galilei. This book uses hitherto secret sources of the Inquisition and Index to reconstruct the history of Roman censorship in its first, formative years from the standpoint of Galileo's judge. Robert Bellarmine (1542-1621) was a censor for the Index and a "consultor" to the Holy Office, before becoming cardinal-inquisitor and (three centuries after his death) a saint and Doctor of the Church. His career provides a paradigm of how an intellectual could make his way to the top in Counter-Reformation Rome. Censored by Pope Sixtus V, Bellarmine responded by suppressing the pontiff's version of the Vulgate and by repressing the Sistine Index of Prohibited Books. A new interpretation - including a revaluation of Galileo's first "trial"- of Roman censorship is offered in this book. Based on unpublished sources from the archives, which it edits and interprets for the first time, "The Saint as Censor" will alter our understanding of the Roman Inquisition and the Index.
