Moon Phase Astrology Nov 14 2019 A guide to understanding the phases of astrological Moon signs and their effects on emotions and personality • Describes the positive and negative character-defining traits of each of the 96 Moon phase/Moon sign combinations • Explains how to use your natal Moon's sign and phase to predict how current and approaching Moons can affect you • Explores the universal challenges arising during each Moon phase throughout the year and ways to honor each phase as it passes The Moon's ever-changing phases offer a way to deepen our understanding of our natal Moon sign as well as the Moon's day-to-day influence on our emotional tides. Through its 8 phases and its wandering dance through each of the 12 signs of the Zodiac--from the Infant's Moon (the New Moon in Aries) to the Storyteller's Moon (the Full Moon in Gemini) to the Prophet's Moon (the waning Balsamic Moon in Aquarius)--the Moon shares its story in 96 different ways. Telling the stories of the heart of all 96 Moon phase and Moon sign combinations, Raven Kaldera explains the creative gifts and emotional challenges bestowed upon those born under each Moon archetype as well as how to nurture the positive traits and improve--or at least discourage--the negative ones. Exploring the influences each Moon archetype has on us as it passes, the author reveals which Moons are the most difficult, what innate qualities each Moon brings out in us, and what we can do to honor each Moon. Including evocative quotes illuminating the nature of each Moon, Kaldera shows how to use your natal Moon's astrological sign and phase to find your "hidden Moons"--the shadows cast by passing Moons--and predict how current and approaching Moons will affect you.

America's White Table Dec 08 2021 The White Table is set in many mess halls as a symbol for and remembrance to service members fallen, missing, or held captive in the line of duty. Solitary and solemn, it is the table where no one will ever sit. As a special gift to her Uncle John, Katie and her sisters are asked to help set the white table for dinner. As their mother explains the significance of each item placed on the table Katie comes to understand and appreciate the depth of sacrifice that her uncle, and each member of the Armed Forces and their families, may be called to give. It was just a little white table... but it felt as big as America when we helped Mama put each item on it and she told us why it was so important. "We use a Small Table, girls," she explained first, "to show one soldier's lonely battle against many. We cover it with a White Cloth to honor a soldier's pure heart when he answers his country's call to duty." "We place a Lemon Slice and Grains of Salt on a plate to show a captive soldier's bitter fate and the tears of families waiting for loved ones to return," she continued. "We push an Empty Chair to the table for the missing soldiers who are not here..." Post-program impacts of transfer programs on child development: Experimental evidence from Bangladesh Aug 24 2020 Evidence shows transfer programs can improve early childhood development (ECD). However, knowledge gaps remain on how short-term impacts on ECD evolve as children grow older, how program design features and context affect child development impacts over time, and through what pathways such impacts occur. We study the Transfer Modality Research Initiative (TMRI), a 2-year randomized controlled trial in two regions of Bangladesh that provided cash or food transfers, with or without complementary nutrition programming, to mothers of children aged 0-2 years at baseline. Drawing on data collected at 6 months post-program (when children were about 2-4 years old) and at 4 years post-program (when children were about 6-8 years old), we assess post-program impacts of TMRI on children's home environment and development. We find strong post-program impacts on the home environment from cash transfers in the Northern region, particularly when combined with complementary programming, however limited

Literacy Development and Enhancement Across Orthographies and Cultures Jan 17 2020 One key measure of a country's status in the world is the literacy of its people; at the same time, global migration has led to increased interest in bilingualism and foreign language learning as topics of research. Literacy Development and Enhancement Across Orthographies and Cultures reviews international studies of the role of literacy in child development, particularly how children learn their first written language and acquire a second written and spoken one. Comparisons and contrasts are analyzed across eight countries and 11 languages, including English, Spanish, Mandarin, Hebrew, Dutch, and Catalan. Using qualitative and quantitative, established and experimental methods, contributors trace toddlers' development of print awareness, clear up common myths regarding parental involvement and non-involvement in their children's literacy, and suggest how the spelling of words can aid in the gaining of vocabulary. For added relevance to educators, the book includes chapters on early intervention for reading problems and the impact of pedagogical science on teaching literacy. Highlights of the coverage: Letter name knowledge in early spelling development Early informal literacy experiences Environmental factors promoting literacy at home Reading books to young children: what it does—and doesn't do The role of orthography in literacy acquisition among monolingual and bilingual children Gaining literacy in a foreign language Instructional influences on literacy growth Literacy Development and Enhancement Across Orthographies and Cultures adds significant depth and interest to the knowledge base and should inspire contributions from additional languages and orthographies. It belongs in the libraries of researchers and educators involved in cognitive psychology, language education, early childhood education and linguistics.

Developing Narrative Comprehension Mar 11 2022 Comprehension of texts and understanding of questions is a cornerstone of successful human communication. Whilst reading comprehension has been thoroughly investigated in the last decade, there is surprisingly little research on children's comprehension of picture stories, particularly for bilinguals. This can be partially explained by the lack of cross-culturally robust, cross-linguistic instruments targeting early narration. This book presents an inference-based model of narrative comprehension and a tool that grew out of a large-scale European project on multilingualism. Covering a range of language settings, the book uses the Multilingual Assessment Instrument for Narratives to answer the question which narrative comprehension skills (bilingual) children can be expected to master at a certain age, and explores how such comprehension is affected (or not affected) by linguistic and extra-linguistic factors. Linking theory to method, the book will appeal to researchers in linguistics and psychology and graduate students interested in narrative, multilingualism, and language acquisition.

Instructional Practices Jun 14 2022 Metacognition, Cognition, and Human Performance, Volume 2: Instructional Practices is a collection of papers that deals with applied settings that develop and test instructional programs in the field of education. The book discusses some insights in understanding the processes involved in writing and reading. The text defines metacognition — as a mental function and the directing of this function — and reading, as well as the structure of narratives. One paper proposes a model for cognitive monitoring and early reading by developing for children three knowledge domains: function of print, form of print, and conventions of print or metacognitive constructs. Other papers analyze metacognition, instruction, the role of questioning activities, as well as the connection between metacognition and learning disabilities. One author evaluates a different perspective whether attention-related difficulties are a normal development in a young child or a disability in the older child. This author also explains meta-attention pertaining to task solving, selective attention to other stimuli, and visual search of the surrounding or for a target object. One research shows that methodologies designed to induce underachieving children to regulate their own academic behavior can improve their performance. The text can prove useful to child psychologists, behavioral scientists, and students and professors in child education.
