You are holding a unique and special book in your hand. It is unique in many aspects. In western contemporary art the spiritual and religious elements exist primarily as cultural historical references, personal faith and religion being understood as the most private and intimate issues. It is indeed a brave and rare statement for an artist to confess that a spiritual quest is the foundation and basic element of his work. Born in a multi-religious family, Gabriele Goria started his own spiritual odyssey at a remarkably early age. He devoted his life to the practice of meditation and training in martial arts. Not a very common combination of activities for a young person. Drawing on his lifelong training in T'ai Chi Ch'üan and Ch'i Kung together with working on meditation techniques and philosophical and spiritual enquiry, Gabriele has developed his own approach to making and teaching theatre. In this book the writer describes vividly his long and multi-dimensional way from the crucifix of the Roman Catholic Church to Paramahansa Yogananda to arrive at a synthesis which he has named Experiential Pluralism. Gabriele Goria also tells us how naturally his multi-religious background and all his other interests form the basis for his creative work. In his two long-term projects Moving the Silence and Hermits in Progress, Gabriele Goria walks the talk: he is fearlessly testing his way of thinking in practice in very demanding surroundings. During these processes the complexity of different philosophical theories is embodied in movement and silence. It is interesting to follow a narrative, in which all words become useless, and making and teaching art and a personal spiritual search flow into a single process. Gabriele Goria writes about his own process in very honest and sincere words.

The reader becomes convinced that Gorla has a lifelong mission, which is anything but dogmatic and restrictive. His concept of Experiential Pluralism is a true and living ecumenism. What could our times need more!

Gabriele may not like to be called exceptional or unique, but all I can say is that I've never met anyone like him.

Diploma Thesis from the year 2016 in the subject Business economics - Business Management, Corporate Governance, grade: 1.5, Utrecht University, course: International Management, language: English, abstract: The paper examines the relationship between the nation of an M&A transaction's target company and the probability of deal completion/ pre-merger failure based on a sample of transactions proposed by Dutch bidders during the period ranging from 2003 to 2015 with other Dutch companies; British (UK); or American (US) targets. By the logistic regression analysis, the US-targeted deals were found to be associated with higher probabilities of pre-merger failure which is aimed to be explained by applying a mediation analysis of several country-specific indicators potentially affecting the deal completion. This way, four factors which are addressed in the theoretical part of the paper (including the restrictiveness of the merger control mechanisms, effectiveness of corporate-related legislation and the time and complexity of contract enforcement) were found to be the mediators of the relationship between the target nation and pre-merger failure. Additionally, according to the regression results, transactions conducted during the end of a merger wave are expected to be less likely completed than the ones negotiated in the earlier or later stages, regardless of the target nation.

#1 New York Times Bestseller "Go Set a Watchman is such an important book, perhaps the most important novel on race to come out of the white South in decades." — New York Times

A landmark novel by Harper Lee, set two decades after her beloved Pulitzer Prize-winning masterpiece, *To Kill a Mockingbird*. Twenty-six-year-old Jean Louise Finch—"Scout"—returns home to Maycomb, Alabama from New York City to visit her aging father, Atticus. Set against the backdrop of the civil rights tensions and political turmoil that were transforming the South, Jean Louise's homecoming turns bittersweet when she learns disturbing truths about her close-knit family, the town, and the people dearest to her. Memories from her childhood flood back, and her values and assumptions are thrown into doubt. Featuring many of the iconic characters from *To Kill a Mockingbird*, *Go Set a Watchman* perfectly captures a young woman, and a world, in painful yet necessary transition out of the illusions of the past—a journey that can only be guided by one's own conscience. Written in the mid-1950s, *Go Set a Watchman* imparts a fuller, richer understanding and appreciation of the late Harper Lee. Here is an unforgettable novel of wisdom, humanity, passion, humor, and effortless precision—a profoundly affecting work of art that is both wonderfully evocative of another era and relevant to our own times. It not only confirms the enduring brilliance of *To Kill a Mockingbird*, but also serves as its essential companion, adding depth, context, and new meaning to an American classic.

In September of 1967, Western Michigan University graduate Paul Tregembo was hired Mr. LB Williams to take the helm of a blooming auto shop program at Roseville High School in Detroit. Little did Tregembo know that by taking control of the Roseville High School Auto Shop, he was beginning a nearly half a century-long journey that would take the program from obscurity to prominence. Since 1967, RHS had made a name for itself across various spectrums of the automotive world. They won a 1976 Automobile Racing Club of America (ARCA) Track Championship, along with capturing a 2010 International Show Car Association (ISCA) Class Championship. More recently, RHS has continued its success in building both a 2014 America's Most Beautiful Roadster (AMBR) Award Contender, and a 2015 Great American Racing Series (GARS) professional stock car. In forty nine years, Tregembo and RHS have set the standard for all automotive technology programs to follow, and while doing so, have inspired hundreds of students to follow their dreams. Now for the first time, experience the story of the Roseville High School Auto Shop program in this extensive, 210 page book, containing over 1,500 photos and multiple first account retellings of the program's greatest moments. Academic Paper from the year 2020 in the subject Leadership and Human Resource Management - Leadership, , language: English, abstract: The intention of this book is to demonstrate

the disconnect that exists between leaders and followers. This is in an effort to demonstrate the important role of the follower as a key variable in the success equation of an organisation. While the concept of leadership is well written and researched about, that of the follower remains insignificantly discussed. The argument for and against leaders vs. manager is continuing in the academic world but that of the follower is barely considered. This book attempts to shade light on the importance of the subordinates. Followers are a crucial variable in the success of any organisation. How well they are treated and allowed to flourish will contribute largely to the success of an organisation. As cooperating assistants with less power, authority and influence, they are an invaluable support to the leader of the day. Leadership though highly sought in career advancement, is not devoid of humanity, humanity precedes all titles. Our generation views leadership on the basis of being ahead somewhat, being a little higher than the rest of the flock so to say. The idea of being ahead easily over exerts itself in action unfortunately creating unhealthy environments for the followers. This book looks at the followers and how minus their existence leadership does not exist. The content brings to the fore the fine balance that interplays in the workforce and a perhaps an internal look at the dynamics that leadership often ignores, that followers make leaders and thus need to be considered on the human interface before their roles. The followers are not just items or objects that need to be moved as in a chess game in order to get the prize, these are humans who need to be led as humans but tactfully approached in their positions. Neither should followers be zombie like in following the instructions outlined by leaders that they are devoid of mental input. Followers are neither detached from humanity and require it considered in the work environment in order to be motivated and to put in that extra element that brings the objectives of a company to fruition. This fine balance between leadership and followers in any environment is discussed in order to highlight how important both parties are and how one interwoven in the other relies on the other in order to exist. As we move into the post-2015 era of the Sustainable Development Goals (SDGs), the world faces many seemingly intractable problems. Malnutrition should not be one of them. Countries that are determined to make rapid advances in malnutrition reduction can do so. If governments want to achieve the SDG target of ending all forms of malnutrition by 2030, they have clear pathways to follow. There are many levers to pull, and this report provides many examples of countries that have done so. Tackling malnutrition effectively is also key to meeting many other SDG targets. Good nutrition signals the realization of people's rights to food and health. It reflects a narrowing of the inequalities in our world. Without good nutrition, human beings cannot achieve their full potential. When people's nutrition status improves, it helps break the intergenerational cycle of poverty, generates broad-based economic growth, and leads to a host of benefits for individuals, families, communities, and countries. Good nutrition provides both a foundation for human development and the scaffolding needed to ensure it reaches its full potential. Good nutrition, in short, is an essential driver of sustainable development. **Algorithms for Automating Open Source Intelligence (OSINT)** presents information on the gathering of information and extraction of actionable intelligence from openly available sources, including news broadcasts, public repositories, and more recently, social media. As OSINT has applications in crime fighting, state-based intelligence, and social research, this book provides recent advances in text mining, web crawling, and other algorithms that have led to advances in methods that can largely automate this process. The book is beneficial to both practitioners and academic researchers, with discussions of the latest advances in applications, a coherent set of methods and processes for automating OSINT, and interdisciplinary perspectives on the key problems identified within each discipline. Drawing upon years of practical experience and using numerous examples, editors Robert Layton, Paul Watters, and a distinguished list of contributors discuss Evidence Accumulation Strategies for OSINT, Named Entity Resolution in Social Media, Analyzing Social Media Campaigns for Group Size Estimation, Surveys and qualitative techniques in OSINT, and Geospatial reasoning of open data. Presents a coherent set of methods and processes for automating OSINT Focuses on algorithms and applications allowing the practitioner to get up and running quickly Includes fully developed case studies on the digital underground and predicting crime through OSINT Discusses the ethical considerations when using publicly available online data

**Allergies, asthma, obesity, acne:** these are just a few of the conditions that may be caused—and someday cured—by the microscopic life inside us. The key is to understand how this groundbreaking science influences your health, mood, and more. In just the last few years, scientists have shown how the microscopic life within our bodies— particularly within our intestines—has an astonishing impact on our lives. Your health, mood, sleep patterns, eating preferences—even your likelihood of getting bitten by mosquitoes—can be traced in part to the tiny creatures that live on and inside of us. In **Follow Your Gut**, pioneering scientist Rob Knight pairs with award-winning science journalist Brendan Buhler to explain—with good humor and easy-to-grasp examples—why these new findings matter to everyone. They lead a detailed tour of the previously unseen world inside our bodies, calling out the diseases and conditions believed to be most directly impacted by them. Document from the year 2021 in the subject Politics - International Politics - Region: Africa, , language: English, abstract: It is without dispute that Africa is rich in diverse non-renewable natural resources and has a large market share for the production of various minerals. Over the years, corruption practices have festered in various institutions within Africa. Although different challenges have contributed to the collapse of the African economy, appropriate reforms can be developed. The expansion of the economic influence of China in Africa has given the Chinese government a comparative advantage in its bilateral trade with African countries. The continuous increase in the role of the Chinese government in African countries has been fostered by the political rulers in the continent. But what are the risks of the Chinese impact on Africa? Does Africa really profit? How can the African institutions work more effectively? Can the Chinese actions be interpreted as a recolonization of Africa? For some African nations, a partnership with China is irresistible because of the significant and urgent need for infrastructure, which China is willing to finance with relaxed but punitive and exorbitant repayment terms. Dr. Richard Young analyses the Chinese impact and its goals to assess the consequences for the African continent. He explains the problems of earlier colonization and connects them to mistakes being made in the present. The author gives practical advice

how to deal with the situation and how to improve Africa's institutional for more effectiveness. This book is designed as a software-based lab book to complement a standard textbook in a mechanics of material course, which is usually taught at the undergraduate level. This book can also be used as an auxiliary workbook in a CAE or Finite Element Analysis course for undergraduate students. Each book comes with a disc containing video demonstrations, a quick introduction to SOLIDWORKS, and all the part files used in the book. This textbook has been carefully developed with the understanding that CAE software has developed to a point that it can be used as a tool to aid students in learning engineering ideas, concepts and even formulas. These concepts are demonstrated in each section of this book. Using the graphics-based tools of SOLIDWORKS Simulation can help reduce the dependency on mathematics to teach these concepts substantially. The contents of this book have been written to match the contents of most mechanics of materials textbooks. There are 14 chapters in this book. Each chapter is designed as one week’s workload, consisting of 2 to 3 sections. Each section is designed for a student to follow the exact steps in that section and learn a concept or topic of mechanics of materials. Typically, each section takes 15-40 minutes to complete the exercises. Each copy of this book comes with a disc containing videos that demonstrate the steps used in each section of the book, a 123 page introduction to Part and Assembly Modeling with SOLIDWORKS in PDF format, and all the files readers may need if they have any trouble. The concise introduction to SOLIDWORKS pdf is designed for those students who have no experience with SOLIDWORKS and want to feel more comfortable working on the exercises in this book.
