" " La copertina del libro: Azzo di Gobatsburg E francobollo commemorativo Machiavelli's ideas are as important in our time as in his own. His insights and prescriptions help us make sense of today's political upheavals and natural calamities and reduce them to a working order. The chapters in Machiavelli Then and Now explore Machiavelli's central concerns: statecraft and order, liberty and citizenship, diplomacy and leadership, modes of strategization, the quest for empire - all set against the basic contention between autarchy, oligarchy and democracy. They also address the ethical and behavioural factors behind political practice, such as force, suasion, ambition, corruption and vigilance in public discourse. The contributors consider the role of language, text and the imagination in Machiavelli, and they

also bring the Machiavellian discourse closer to our own times, in relation to Gandhi, Gramsci and Althusser. The book will interest historians, political scientists and students of public policy; philosophers, rhetoricians and literary critics; and no less institution builders, diplomats and, administrators. The Arthurian Archives series of texts and editions in translation, edited by Norris J. Lacy, makes a start on Italian Arthurian

material, with a 14c Tristan text. This is the first critical edition with English translation of the prose compilation *Tristano panciatichiano*, preserved in a unique manuscript in the Biblioteca Nazionale of Florence (MS Panc. 33); it is the first time the Italian text has been published in its entirety in any form. Assembled by the mid-fourteenth century, the manuscript is an original compilation in Italian based on several French models: the *Queste del San Graal*, *Josephd'Arimathie*, the *Mort Artu*, and notably, the *Roman de Tristan en prose*. While the edition itself will be of great interest, the translation into English is a major opportunity for Arthurians and other medievalists, and furnishes important new evidence for the study of Arthurian material in Italy. Apparatus includes a finding list of Arthurian manuscripts produced, owned or read by Italians; a select bibliography; and an index of proper names found in the narrative. "The central importance of the actor-author is a distinctive feature of Italian theatrical life, in all its

eclectic range of regional cultures and artistic traditions. The fascination of the figure is that he or she stands on both sides of one of theatre's most important power relationships: between the exhilarating freedom of performance and the austere restriction of authorship and the written text. This broad-ranging volume brings together critical essays on the role of the actor-author, spanning the period from the Renaissance to the present. Starting with Castiglione, Ruzante and the *commedia dell'arte*, and surveying the works of Dario Fo, De Filippo and Bene, among others, the contributors cast light on a tradition which continues into Neapolitan and Sicilian theatre today, and in Italy's currently fashionable 'narrative theatre', where the actor-author is centre stage in a solo performance." This volume assembles 50 contributions presented at the XVII International Colloquium on Latin Linguistics. They embrace essential topics of Latin linguistics with different theoretical and methodological approaches: phonetics, syntax, etymology and

semantics, pragmatics and textual analysis. It is a useful resource for the study of comparative and general linguistics, not only for linguists but also for scholars of classical philology. This volume brings together a selection of the papers on the theme of the Papacy and the Crusades, delivered at the 7th Congress of the Society for the Study of the Crusades and the Latin East. After the introduction by Michel Balard, the first papers examine aspects of crusader terminology. The next section deals with events and perceptions in the West, including papers on the crusades against the Albigensians and Frederick II, and on the situation in the Iberian peninsula. There follow studies on relations between crusaders and the local populations in the Byzantine world after 1204 and Frankish Greece, and in Cilician Armenia, while a final pair looks at papal interventions in Poland and Scandinavia. This volume is addressed to researchers in the field of phraseology, and to teachers, translators and lexicographers. It is a collection of essays offering a comprehensive, modern

analysis of phrasemes, embracing a wide range of subjects and themes, from linguistic, both applied and theoretical, to cultural aspects. The contrastive approach underlying this variety of themes allows the divergences and analogies between phraseological units in two or more languages to be outlined. The languages compared here are both major and minor, European and non-European, and the text includes contrastive analyses of the most commonly investigated languages (French-German, English-Spanish, Russian-German), as well as some less frequently investigated languages (like Ukrainian, Romanian, Georgian and Thai), which are not as well-represented in phraseological description, despite their scientific interest.
