This first volume in a catalogue raisonné of Tuymans's paintings surveys nearly 200 works from the vital early years of his career Credited with a key role in the revival of painting in the 1990s, Belgian artist Luc Tuymans (b. 1958) continues to produce subtle, and at times unsettling, works that engage with history, technology, and everyday life. This first volume in a catalogue raisonné of Tuymans's paintings surveys nearly 200 works that were vital to his artistic development. The years 1972 to 1994 witnessed the maturation of his signature method of painting from preexisting imagery--such as magazine images, Polaroids, and television footage--as well as his first solo exhibition. Also dating from this period are many of his seminal canvases, along with ten poignant portraits of the ailing human body and the enigmatic series Superstition that comprised his first works exhibited in the United States. The catalogue features brilliant new photography of each of the paintings and an illustrated chronology with archival images and installation shots of the works in this volume. This publication is a testament to Tuymans's persistent assertion of the relevance and importance of painting--a conviction that he maintains even in today's digital world, when his work continues to be a touchstone for artists and scholars. Following on author Peter Rollins' motto "If it isn't popular, it isn't culture," this collection of new essays considers Vince Gilligan's award-winning television series Breaking Bad as a landmark of Western culture--comparable to the works of Shakespeare and Dickens in their time--that merits scholarly attention from those who would understand early the 21st century zeitgeist. The essayists explore the series as a critique of American concepts of masculinity, with Walter White discussed as a father archetype--provider, protector, author of a legacy--and as a Machiavellian warrior on the capitalist battleground. Other topics include the mutual exclusivity of intellect and masculinity in American culture, and the dramatic irony as White's rationales for his criminal life are gradually revealed as a lie. In "round table" chapters, contributors discuss the show's reception, fans who root for "Team Walt," "Skyler-hating" and Breaking Bad as a feminist text. A glimpse of the savvy that built a global corporation from scratch Hess: The Last Oil Baron profiles a titan of the oil industry, mapping the journey of the quintessential American dream. The story of Leon Hess follows an immigrant kosher butcher's son as he builds an oil dynasty that may never be matched. The multinational, multi-billion-dollar company began with a single second-hand delivery truck and the Rockefeller-caliber business acumen of one young man. Interviews with former employees, beneficiaries, and even his high school sweetheart provide an insider's perspective on the man behind the legacy, allowing today's aspiring entrepreneurs the opportunity to learn from one of the nation's most inspiring success stories. Leon Hess built a global empire from the ground up. Along the way, he fought in a war, did business with Muammar Qaddafi, won a Super Bowl as the owner of the Jets, was involved in Watergate, and introduced the Hess toy truck that became a holiday tradition for millions of Americans. More than just a book of business strategy, Hess tells the story of a life fascinatingly lived, and the legacy he left behind. Discover the man behind the company, the Jets football team, and the iconic toy truck Learn how the actions of Leon Hess affected the modern push toward energy independence Study the strategy that turned a single-truck operation into a major integrated company Consider the challenges Hess Corp. faces to its family legacy today, and the solutions being implemented Leon Hess' strategies and techniques can be emulated and imitated, but his entrepreneurial fire is something altogether more rare. Hess provides readers with a glimpse of the man whose unrivaled ambition changed an industry and a nation. This book examines the founding non-sectarian approach to Canadian statecraft that accommodated religious and cultural diversity. The 1960's promise of political liberalism embraced in Canada was to provide a philosophy of government that facilitates the individual's vision and pursuit of the good life. Decades later, the promotion of individual autonomy and fraternity by governments and the courts threatens to undermine the very freedom governments claim to promote and protect. Bruce J. Clemenger presents a biblically-based model of public and political engagement and a defense of religious freedom, especially the freedom to disagree, in an increasingly secularist state. A timely work. Known around the world as a bastion of Catholicism and machismo, Latin America has emerged in recent years as the undisputed gay rights leader of the Global South. Even more surprising is that several Latin American nations have surpassed many developed nations, including the United States, in legislating equality for the LGBT community. So how did this dramatic and unexpected expansion of gay rights come about? And why are Latin American nations diverging in their embrace of gay rights, a point highlighted by the paradoxical experiences of Argentina and Brazil? Argentina, a country with a dark history of repression of homosexuality, legalized same-sex marriage in 2010, a first for a Latin American nation; and since then it has enacted laws to ensure transgender equality, to abolish "ex-gay reparative therapy," and to provide reproductive assistance to same-sex couples. By contrast, Brazil, a country famous for celebrating sexual diversity, proved incapable of legalizing same-sex marriage via the legislature, leaving the job to the courts; and Brazilian anti-gay discrimination laws are among the weakest in Latin America. In *Out in the Periphery*, Omar G. Encarnaci?n breaks away from the conventional narrative of Latin America's embrace of gay rights as a by-product of the global spread of gay rights from the developed West. Instead, Encarnaci?n aims to "decenter" gay rights politics. His intention is not to demonstrate how the "local" has trumped the "global" in Latin America but rather to suggest how domestic and international politics interacted to make Latin America one of the world's most receptive environments for gay rights. Economic and political modernization, constitutional and judicial reforms, and the rise of socially liberal governments have all contributed to this receptivity. But the most decisive factor was the skill of local activists in crafting highly effective gay rights campaigns. Inspired by external events and trends, but firmly grounded in local politics and realities, these campaigns succeeded in bringing radical change to the law with respect to homosexuality and, in some cases, as in Argentina, in transforming society and the culture at large. Foreign capital and free trade policies have provoked fierce conflicts in South America in recent years. People in Colombia and Peru engaged in often violent clashes to defend their livelihoods against the encroachments of the free market and the impositions of Wall Street. Farmers organized to save their lands from foreign mining corporations, and cities fought to save their water from contamination. Native Americans blocked highways to preserve ancestral lands, while students paralyzed universities and called for reforms to higher education. The shift toward socialism in Venezuela, led by President Hugo Ch?vez, was bitterly opposed by privileged groups. Governments tried to quell the turmoil through repression, political maneuvering and propaganda. This book provides a dramatic account of the struggles. In July 2011, South Sudan was granted independence and became the world's newest country. Yet just two-and-a-half years after this momentous decision, the country was in the grips of renewed civil war and political strife. Hilde F. Johnson served as Special Representative of the Secretary-General and Head of the United Nations Mission in the Republic of South Sudan from July 2011 until July 2014 and, as such, she was witness to the many challenges which the country faced as it struggled to adjust to its new autonomous state. In this book, she provides an unparalleled insider's account of South Sudan's descent from the ecstatic celebrations of July 2011 to the outbreak of the disastrous conflict in December 2013 and the early, bloody phase of the fighting. Johnson's frequent personal and private contacts at the highest levels of government, accompanied by her deep knowledge of the country and its history, make this a unique eyewitness account of the turbulent first three years of the world's newest - and yet most fragile - country. This book has been written for the students of third semester of electrical engineering of Gujarat Technological University (GTU). It would also be useful for the students of third semester of power electronics branch. The book provides comprehensive knowledge of the DC machines and transformers and has an extended summary in the form of 'Key points to remember', and a large number of solved and unsolved problems. In the exercise, the questions have been presented in accordance with the GTU examination pattern. Key Features • Strictly as per the GTU syllabus • Over 125 descriptive questions • Examinations oriented approach • Includes questions of the last five years of GTU examinations Recent events in Ukraine and Russia and the subsequent incorporation of Crimea into the Russian state, with the support of some circles of inhabitants of the peninsula, have shown that the desire of people to belong to the Western part of Europe should not automatically be assumed. Discussing different perceptions of the Ukrainian-Russian war in neighbouring countries, this book offers an analysis of the conflicts and issues connected with the shifting of the border regions of Russia and Ukraine to show how 'material' and 'psychological' borders are never completely stable ideas. The contributors - historians, sociologists, anthropologists and political scientists from across Europe - use an interdisciplinary and comparative approach to explore the different national and transnational perceptions of a possible future role for Russia. Der Aufstieg der Volksrepublik China stellt die internationale Politik und Diplomatie vor immense Herausforderungen. Gleichzeitig nehmen die Spannungen zwischen den USA und der Volksrepublik unaufh?rlich zu. Beide Staaten steuern unmittelbar auf einen Konflikt zu, den keine Seite intendiert und dessen allumfassende Konsequenzen noch kaum absehbar sind. Ein besonderer Schauplatz dieser wachsenden Auseinandersetzung ist die Region S?dostasien, in der sowohl die USA, im Verbund mit einigen Anrainerstaaten, als auch die Volksrepublik China miteinander in einem harten Wettbewerb um die regionale Vorherrschaft stehen. Dieses Buch zeigt anhand der territorialen und maritimen Konflikte in der S?dchinesischen See auf, dass Chinas zunehmend proaktive und r?cksichtslosere Position gegen?ber diesen Konflikten und den Konfliktparteien auch eine Folge der zunehmenden Wahrnehmung von Respektlosigkeit und dem damit einhergehenden Wunsch Chinas, dies entsprechend zu korrigieren, ist und nicht allein eine strategische Entscheidung oder gar unvermeidliche Entwicklung darstellt. Auf diesen Ergebnissen aufbauend wird die M?glichkeit eines nachhaltigen Konfliktmanagements diskutiert und entsprechend eine Reihe konkreter Handlungsempfehlungen formuliert. The eruption of the anti-Assad revolution in Syria has had many unintended consequences, among which is the opportunity it offered Sunni jihadists to establish a foothold in the heart of the Middle East. That Syria's ongoing civil war is so brutal and protracted has only compounded the situation, as have developments in Iraq and Lebanon. Ranging across the battlefields and international borders have been dozens of jihadi Islamist fighting groups, of which some coalesced into significant factions such as Jabhat al Nusra and the Islamic State. This book assesses and explains the emergence since 2011 of Sunni jihadist organizations in Syria's fledgling insurgency, charts their evolution and situates them within the global Islamist project. Unprecedented numbers of foreign fighters have joined such groups, who will almost certainly continue to

host them. Thus, external factors in their emergence are scrutinized, including the strategic and tactical lessons learned from other jihadist conflict zones and the complex interplay between Al-Qaeda and the Islamic State and how it has influenced the jihadist sphere in Syria. Tensions between and conflict within such groups also feature in this indispensable volume. The Association of Southeast Asian Nations (ASEAN) is actively seeking ways for member countries to enhance their individual economic development within the context of overall regional advancement. Central to this is the creation of a regional intellectual property framework. This book examines the efforts to move beyond sovereign protections of intellectual property rights and establish meaningful inter-state cooperation on intellectual property issues. Rather than aim for IP harmonization, ASEAN recognizes its internal diversity and pursues an agenda of 'IP Interoperability'. The essays in this collection examine the unique dynamics of 'interoperability', analyzing the administration of intellectual property in a part of the world that is of increasing importance. The book enables the reader to compare and contrast the ASEAN model to other approaches in regional cooperation, such as Europe and Latin America, and also explores private international law as a potential vehicle for interoperability. "Brain imaging research demonstrates that memory loss actually starts in the brain decades before you have any symptoms. Learn the actions you can take to help not just prevent memory loss later in life ... but to begin restoring the memory you may have already lost."--Amazon.com. *Producing Women* examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed, and produce and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media—including trash the dress wedding photography, Internet how-to instructions about zombie walk brides, nail polish blogging, DIY crafting, and reborn doll production—*Producing Women* elucidates women's production cultures online, and the ways that individuals can critically study and engage with these practices. The global economy got off to a bumpy start this year, but growth in 2015 and 2016 looks to be broadly on track. Projections for developing countries in 2014 have been downgraded by 0.5 percentage points to 4.8 percent mainly reflecting weak first quarter growth in the US due to weather and the conflict in Ukraine. Going forward growth is projected to firm to 5.3 and 5.5 percent in 2015 and 2016 supported by easy global financial conditions and rebounding exports as high-income countries continue to recover under the influence of a reduced drag from fiscal consolidation and improving labor markets. Financial conditions will eventually tighten, and when they do there is risk of further volatility. Most developing countries are in good fiscal and financial shape, but where vulnerabilities remain countries need to tighten policy to reduce the potential impact of external shocks. Overall, growth for developing countries will be solid but not strong enough to generate the income and employment gains needed to eliminate poverty by 2013. As a result, countries need to focus on structural reform in order to lift growth in an enduring and sustainable manner. This volume of collected papers takes stock of what has become known about the war in eastern Ukraine's Donets Basin (Donbas) between April 2014 and mid-2020. It provides an introduction to the conflict and illustrates the key point of contention in the academic debate surrounding it—the question whether this war is primarily an internal Ukrainian phenomenon or the result of a covert Russian invasion. The contributions by recognized specialists from Ukraine, Russia, Germany, and Japan offer multifaceted views and insights into this long-lasting conflict for both expert readers and those who are new to the topic. The volume's contributors are Tymofii Brik, Jakob Hauter, Sanshiro Hosaka, Yuriy Matsiyevsky, Nikolay Mitrokhin, Maximilian Kranich, and Ulrich Schneckener. The second three months - 91 stories - by the 31 authors from Pure Slush's '2014 A Year in Stories'. Authors include Guilie Castillo-Oriard, Townsend Walker, Derek Osborne, Gloria Garfunkel, John Wentworth Chapin, Lynn Beighley, Andrew Stancek, Rachel Ambrose, Gill Hoffs, Jessica McHugh, Shane Simmons, Michelle Elvy, Len Kuntz, Michael Webb, James Claffey, Gwendolyn Joyce Mintz, Stephen V. Ramey, Gay Degani, Sally-Anne Macomber, Mandy Nicol, Margaret Bingel, Darryl Price, Teresa Burns Gunther, Matt Potter, Gary Percesepe, Nathaniel Tower, Kimberlee Smith, Vanessa Weibler Paris, Joanne Jagoda and h. l. nelson This book provides the first comprehensive analyses of the challenges all European welfare systems have been facing since 2007, combining in-depth country-based studies and comparative chapters. It focuses on: 1) the economic and financial crisis, 2) demographic change, and 3) the balance between avoiding risks and opening up opportunities in social policy. The results show that European welfare systems tend to face the same challenges in different ways and that also their responses to those challenges differ considerably. Although the EU also plays a part in shaping national welfare systems, it becomes evident that European welfare systems are by no means converging: in terms of social policy, national diversity within Europe is still a major factor that will shape future developments in European welfare systems. Michael Gove was, unquestionably, a pivotal figure in British educational reform during his time as the coalition's Secretary of State for Education. This team of experts, drawn from academia, think-tanks and trade unions, offer an unrivalled early assessment of the impact of Gove, and his reforms, on the British educational landscape. The first edition of *Anthropology and Climate Change* (2009) pioneered the study of climate change through the lens of anthropology, covering the relation between human cultures and the environment from prehistoric times to the present. This second, heavily revised edition brings the material on this rapidly changing field completely up to date, with major scholars from around the world mapping out trajectories of research and issuing specific calls for action. The new edition introduces new "foundational" chapters—laying out what anthropologists know about climate change today, new theoretical and practical perspectives, insights gleaned from sociology, and international efforts to study and curb climate change—making the volume a perfect introductory textbook; presents a series of case studies—both new case studies and old ones updated and viewed with fresh eyes—with the specific purpose of assessing climate trends; provides a close look at how climate change is affecting livelihoods, especially in the context of economic globalization and the migration of youth from rural to urban areas; expands coverage to England, the Amazon, the Marshall Islands, Tanzania, and Ethiopia; re-examines the conclusions and recommendations of the first volume, refining our knowledge of what we do and do not know about climate change and what we can do to adapt. *Terrorism: Commentary on Security Documents* is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 146, *Russia's Resurgence*, examines recent developments in the foreign policy and strategy of the Russian Federation, including an examination of its aggression against neighboring states with Russian populations, its recent focus on strengthening its military capabilities, its larger strategy vis-à-vis NATO and the United States, its utilization of hybrid warfare in the "gray zone" to achieve its goals, its increasing influence on Middle Eastern politics, and the historical context within which these developments have occurred. This volume includes Congressional Research Service reports on security issues concerning the United States, Ukraine, and the Russian Federation, as well as an English-language version of the Military Doctrine of the Russian Federation made available to the public, NATO's Framework for Future Alliance Operations, and recent studies on Russia's hybrid warfare from the NATO Defense College and the Joint Special Operations University Press. The IMF's principal statistical publication, *International Financial Statistics (IFS) Online*, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly. Cyberspace is one of the major bases of the economic development of industrialized societies and developing. The dependence of modern society in this technological area is also one of its vulnerabilities. Cyberspace allows new power policy and strategy, broadens the scope of the actors of the conflict by offering to both state and non-state new weapons, new ways of offensive and defensive operations. This book deals with the concept of "information war", covering its development over the last two decades and seeks to answer the following questions: is the control of the information space really possible remains or she a utopia? What power would confer such control, what are the benefits? When Edward Snowden began leaking NSA documents in June 2013, his actions sparked impassioned debates about electronic surveillance, national security, and privacy in the digital age. The *Snowden Reader* looks at Snowden's disclosures and their aftermath. Critical analyses by experts discuss the historical, political, legal, and ethical issues raised by the disclosures. Over forty key documents related to the case are included, with introductory notes explaining their significance: documents leaked by Snowden; responses from the NSA, the Obama administration, and Congress; statements by foreign leaders, their governments, and international organizations; judicial rulings; findings of review committees; and Snowden's own statements. This book provides a valuable introduction and overview for anyone who wants to go beyond the headlines to understand this historic episode. This

volume investigates the policies and politics of extreme austerity, setting the crisis in Greece in its global context. Featuring multidisciplinary contributions and an exclusive interview with former Greek Prime Minister George Papandreou, this is the first comprehensive account of the economic crisis at the heart of Europe. This new publication marks the first comprehensive survey of a seminal body of work that helped make Fred Sandback into the internationally celebrated artist he has become known as today. This catalogue, published on the occasion of the exhibition at David Zwirner, New York, in the fall of 2016, takes its lead from a 1987 mid-career presentation of Sandback's work at Westfälischer Kunstverein in Münster, also called Vertical Constructions. With a mixture of archival imagery of the sculptures in situ in Münster, and new photography of these works installed at Zwirner, this publication is both a historical document and a source of renewed attention to this body of work. It also features an expanded selection of sculpture, going beyond what was presented in the 1987 and 2016 exhibitions, to include key examples of vertical constructions spanning Sandback's career. New scholarship by Yve-Alain Bois revisits his leading argument that was put forth in his essay for the 2005 Kunstmuseum Liechtenstein catalogue about the power of Sandback's immateriality—its ability to linger in our memories—in the context of the vertical constructions. Lisa Le Feuvre, a longtime scholar of sculpture, offers a more historical treatment of the show in relation to the artist's writings and other works. Also included is a text by David Gray, who responds to Marianne Stockebrand's original essay about the Münster installation; he reveals the dialogues around Sandback's practice at the time and helps us reconstruct the way the influence of his vertical works has continued to grow in the thirty years since. REFLECTIONS is the SAT Temple's quarterly journal. "Reflections" contains transcriptions of satsangs at SAT given by Nome, the teachings of Sri Ramana Maharshi, excerpts from "The Ramana Way," (the RMCL journal), excerpts from numerous Advaitic scriptures, updates on events occurring at the SAT Temple, and much more. This book examines why people vote in the newly consolidated democracies of Africa, Latin America, East Asia and Central and Eastern European countries. It addresses the question of how well models or theories of electoral participation, initially developed in established democracies, 'travel' to new democracies. Based on recent cross-national survey data, it provides the first systematic and comparative evaluation of this topic. Drawing on political science, sociology and psychology approaches, it reveals what is distinctive about voting in new democracies and how they compare between themselves and with more established democracies. This book will be of key interest to scholars and students of political participation, public opinion, voting behaviour, electoral politics, and political parties as well as to international organizations and NGOs working in the field of democracy promotion and in emerging democracies. Power electronics are being used to interface renewable sources in order to maximize the energy yield, as well as smoothly integrate them within the grid. In many cases, power electronics are able to ensure a large amount of energy saving in pumps, compressors, and ventilation systems. This book explains the operations behind different renewable generation technologies in order to better prepare the reader for practical applications. Multiple chapters are included on the state-of-the-art and possible technology developments within the next 15 years. The book provides a comprehensive overview of the current renewable energy technology in terms of system configuration, power circuit usage, and control. It contains two design examples for small wind turbine system and PV power system, respectively, which are useful for real-life installation, as well as many computer simulation models. The Spirit and the Church celebrates the life and legacy of Peter Damian Fehlner, OFM Conv., who for the past six decades has carried the torch of the Franciscan theological and philosophical vision in the fields of ecclesiology, pneumatology, Mariology, and anthropology. Articles by colleagues, former students, and associates fall into three broad categories, corresponding with several of the main areas in which Fehlner has made a longstanding scholarly contribution: the Church's Magisterium and development of doctrine, anthropology, comma and creation; the relation between Mariology, pneumatology, and ecclesiology; and scholarly seeds planted by Fehlner now being cultivated and harvested by younger scholars. All of the essays in this volume engage with Fehlner, evaluate his contributions, and build upon and expand in new directions the contributions of our honoree. The essays in this volume manifest the contemporary relevance of Fehlner's Franciscan vision in terms of his invitation to renew the theology of the Church in a Marian mode in the light of Vatican II.
